## SEE HOW OUR WATCH FITS ON YOUR WRIST

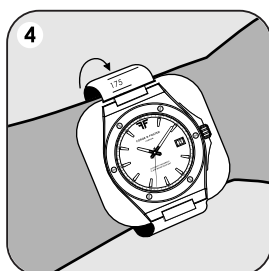

Cut the dotted area as well as making a horizontal slit on the dotted lines underneath the text "Cut this area".

Wrap the paper strap tightly around your wrist, keeping the watch case where you would place your watch.

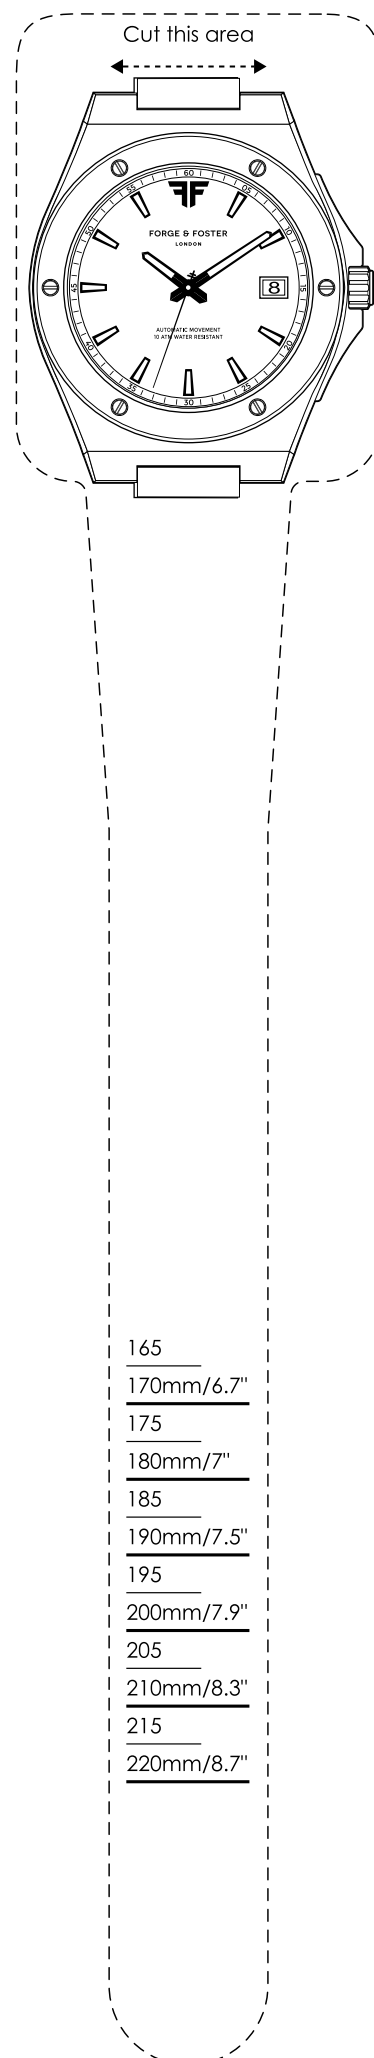

Align the measurement with the lug to determine if the watch will fit on your wrist.

For a sense of fit on your wrist, carefully slide the strap through the horizontal slit and gently pull the strap from underneath to tighten the fit on your wrist.
