- Turn on the Bluetooth of mobile phone #1 and search for the Bluetooth headphones name, then click to complete the connection.
- Turn off the mobile phone #1's Bluetooth and long press the headphones MFB till the red light on to turn off the Bluetooth headphones.
- Turn on the Bluetooth headphones again enter into searching and pairing state.
- Turn on the Bluetooth function of mobile phone #2, Searching for the Bluetooth device and find the headphones name, click to complete the connection.

- Turn on mobile phone #1's Bluetooth function and find the connected Bluetooth headphones before, Click connection to complete 1 for 2.

Keep your Bluetooth headphones to be used around your phone. The straight without block Bluetooth distance is about 10 meters between your phone and Bluetooth headphones. Beyond this distance, its sound quality may decline and lose connection.

### Learn how to reconnect the headphones:

- Your Bluetooth headphones will try to reconnect the disconnection automatically.
- If your Bluetooth headphones does not try to reconnect, Please press the MFB one time or through your Phone's Bluetooth menu to reconnect manually.

### Restore the factory Settings

- Hold the MFB for about 3 seconds when charging, till the red and blue lights flashing three times to restore factory Settings.

### Common problems and solutions

#### 1. Mobile phone can't search the Bluetooth headphones

Solutions:

- To confirm if the Bluetooth headphones is turned on. (Whether the indicator light is on or Red and Blue light flash alternatively)
- If the Bluetooth headphones is turned on but still can not be searched, please to restart your mobile phone and the Bluetooth headphones

Notes:

- When the Bluetooth headphones is in pairing mode, to connect in 2 minutes, or the headphones will turn off automatically after 2 minutes.
- Hold the MFB for about 3 seconds when charging, Till the red and blue lights flashing three times, it can restore factory Settings.

#### 2. After connecting the Bluetooth headphones with your mobile phone, there is always disconnection or noise.

Solutions:

- The Bluetooth headphone is power low, please to charge the headphone soon.
- There is block between the Bluetooth headphones and your mobile phone or it beyond the signal distance. Also, please do not cover the Bluetooth headphones by your hand. To keep signal stable, please keep your phone and the headphones in the same direction.

#### 3. The Bluetooth has been connected, but you can't listen to music.

Solutions:

- Mono Bluetooth headphones can not be used to enjoy music except you match it with Nokia mobile phone.
- Check your Bluetooth setting, to adjust the sound path to hands-free mode.
- Some cell phones also need to set 2 items for the player: to start the player Bluetooth and choose the just connected Bluetooth device, then click ok.
- Some mobile phones are without complete stereo Bluetooth module and Bluetooth function to listen to music. Please connect your Bluetooth headphones with other mobile phones to check whether the Bluetooth headphones is OK or not!

#### 4. Learn how to use Bluetooth headphones to listen music or chat on computer

Answer:

If your computer is equipped with Bluetooth, just to open the Bluetooth function and search the opening Bluetooth headphones, or else you need a Bluetooth adapter. By a Bluetooth software (IVT), the adapter can connect the Bluetooth headphones with computer. Computers with XP system can identify any Bluetooth adapter automatically and it does not need driver, while the adapter software built-in XP can only

transfer files, it can not transmit audio, so you must install the IVT software in CD to transfer audio.

#### 5. When Using, the Max distance between Bluetooth headphones and mobile phone or adapter

Answer:

The available distance between Bluetooth headphones and mobile phone or adapter is 10M. Generally speaking, the result is the best when there is block between them. When it reaches the distance limit, there is light noise when calling.

#### 6. What's the Bluetooth pairing password?

Answer:

The Bluetooth pairing password is 0000, most phones support enter password automatically, only small part phones need to enter password 0000 manually.

#### 7. The red light is not on when charging

Possible reason: It is long time not to use the headphones

Solutions: It needs to charge about 30 minutes, then the red light might be bright  
Note: Overcharge or keep Bluetooth headphones in a closed car etc. such similar environments, it will reduce the capacity and life of the battery.
