Attentions

1. First of all, a blank FM channel must be chosen for car radio, then the frequency of T10 should be adjusted as the same as the frequency of car radio.
2. After a long time use, your car speaker may have some troubles. Therefore, please don't turn up car speaker's volume to maximum to avoid static and distortion effectively.
3. When the device is out of use for a long time, please pull it out of cigarette lighter. When using again, it should be inserted into cigarette lighter after car starts to avoid high voltage damage
