

Calmer[®] kids

Make spiky sounds smooth™

Worn in the ear to reduce stressful sounds for kids so they can focus on the important ones.

"My 8 year old loves them!

Very comfortable.

She wears them at school and she's now able to drown out some of the noise but still participate with her teacher and classmates. Much better than the ear defenders. Thank you so much!"

Calmer[®] Kids

How Calmer Kids works

As humans we hear sound in a range of frequencies from low to high.

Sound can be overwhelming at times and make you feel **stressed and anxious**. Calmer reduces the most annoying sounds and **helps you focus** on the important ones.

Our Hearing

As sound enters our ears without Calmer, it bounces around our ear canal.

This makes the mid to high frequencies seem louder and **can trigger** our stress levels.

With Calmer, sound is **accurately directed into our ears**. This reduces these noises and **helps you focus** on sounds you want to hear.

Two Variants

Calmer Kids & Calmer Kids Secure

Four Colours

Red
Yellow
Blue
Translucent

Material

Super soft silicone

What's Included

1x pair of Calmer Kids
1x mesh pouch
Calmer Kids user guide

Calmer Kids

Length: 20mm
Width: 10.8mm
Weight: 0.2g

Calmer Kids Secure (as above)

Length of attached lanyard approx: 480mm

Calmer Night 8/9

Calmer®

A small device worn in the ear to reduce stress. Calmer features a unique technology that reduces distortion in our ears and calms your environment in a subtle, but potentially life-changing way.

"I have audio sensory issues and these are great for loud, echoing places and restaurants. It's amazing the relief they bring!"

Weight: 0.5g

Calmer Mini

Length: 20mm
Width: 10.8mm
Weight: 0.2g

Calmer Secure (as above)

Length of attached lanyard approx: 480mm

Calmer^{PRO}®

Our most advanced Calmer in the range.

Calmer PRO reduces resonance (distortion) by using a tiny aluminium waveguide to reflect sound into our ear which bypasses the effect of the Concha.

"I take these with me wherever I go (they're on my key chain). I use them all the time when there's a lot of background noise, such as my favorite lunch spot. These reduce the noise enough that I can have a conversation with ease. 10/10 highly recommend!"

Calmer[®] Night

Calmer Night uses the same distortion-reducing technology as our regular Calmer range, but with a slightly increased attenuation of mid-range frequencies.

Calmer Night turns night-time noise into less-jolting sounds to reduce stress at night. Sharp sounds before bed sound more mellow, helping you wind down for a restful night's sleep.

"I've been using them for about a month now and they really do soften noises at night. I was very surprised by how quickly I got used to them as they're comfortable and easy to put in. A lot less wake-up's in the night :) thanks for making this product."
