

FLARES
JET

"They're easily the best in-ear earphones I've ever used. Lovely bottom end, beautiful depth and clarity to the overall sound. It's quite unbelievable."

Pete Paphides

DJ and Music Journalist: Melody Maker, The Guardian, Time Out, Q Magazine

FLARES
JET

DATA SHEET

Flares Jet 1

Made from polymer that packs a lot of sound into a very lightweight and cost-effective earphone.

Flares Jet 2

Our aluminium variant of the Jet range. Again, a lot of bang for your buck and the first of our two metal options of the Jet range. Aluminium is a light yet durable metal and so works beautifully with our technology.

Flares Jet 3

The superior earphone in the Jet range made from titanium. Titanium is a denser more rigid material therefore it produces very little enclosure resonance with a highly accurate sound delivery.

Three Variants:

- Flares Jet 1** - High tensile polymer
- Flares Jet 2** - Aerospace aluminium
- Flares Jet 3** - Grade 5 titanium

Technical Specification

- Jet technology™
- 3.5mm gold plated jack connector
- Microphone and control capabilities
- Cable length: 1.15m
- Driver diameter: 10mm
- Frequency response: 05-20KHz
- Driver sensitivity: 93dB/1mW

- (Without tip)
- Length: 21mm
- Width: 12.5mm

What's included

- 1x pair of Flares Jet
