Step 1: Assemble the different frame sections by pushing and pulling pipes together.
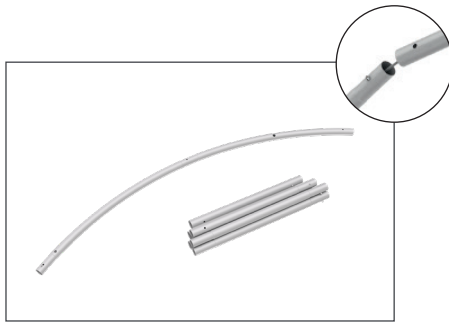

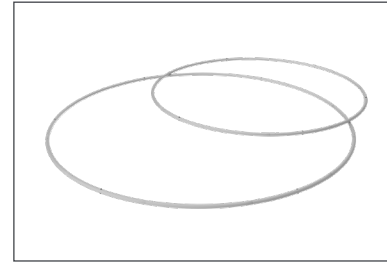

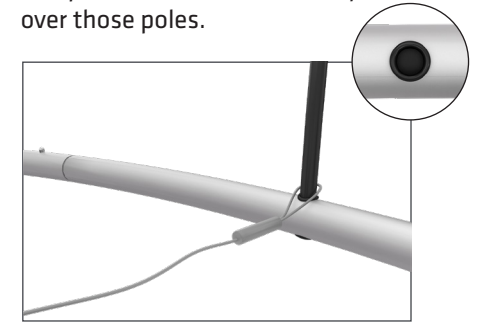

Step 2: Connect all corner sections to longer sections of the frame by matching shape symbols on pipes.
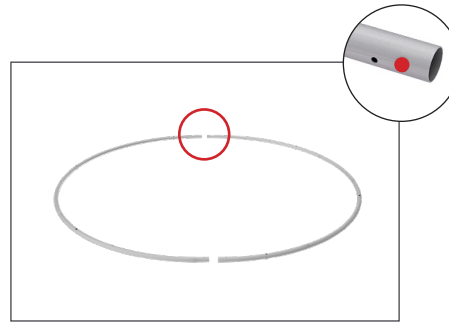

Step 3: Align two frames together making sure holes face each other.

Step 4: Push all support poles into one frame. **Step 5:** Locate all the poles pushed into black grommets and place one end of a cable eyelet over those poles.
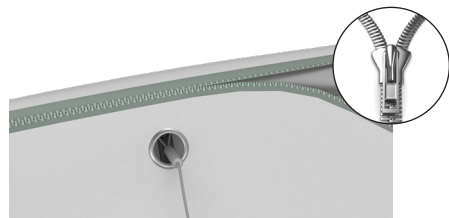

Step 6: Align top frame to bottom frame and push support poles into the frame. With some force connect the support poles in the middle to complete.

Match black grommets top and bottom.
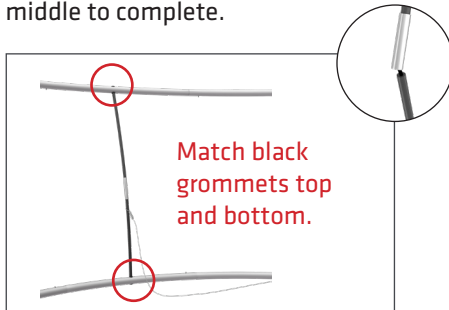

Step 7: Unzip print and place one frame inside. Position holes on frame to align with eyelets in graphic. Thread cable through eyelet. Repeat for all eyelets.
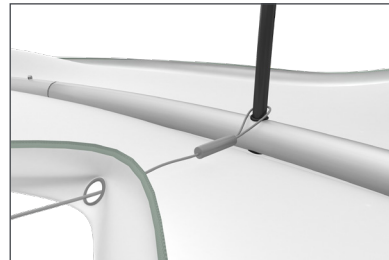

Step 9: Complete.

Step 8: Zip graphic closed around top of frame. Pull all cables out until inside loop is flush with eyelets. Attach all cables together at a single point for hanging.
