

AirFit™ N30i

Nasal cradle mask

Fitting guide for AirFit N30i

- 1 Pull the frame and headgear over your head until the elbow is positioned on top and the headgear is behind your head.

- 2 Place the cushion under your nose.

- 3 Tighten or loosen the headgear until the cushion fits comfortably under your nose.

- 4 Squeeze the side buttons on the elbow and detach from the frame.

- 5 Connect the air tubing from your device to the elbow.

- 6 Reattach the elbow to the frame. The mask is now ready to use.

Additional options

For patients with longer hair, we recommend feeding their hair through the back of the headgear. If tied in a pony tail, it should sit high enough to fit comfortably through the back of the headgear.

Refer to the user guide for further instructions and complete labeling information including indications, contraindications, warnings and precautions.

A more natural mask experience

ResMed AirFit N30i features a top-of-the-head tube design and nasal cradle cushion that allows patients the freedom to sleep in the position of their choice. The SpringFit frame is designed to adapt to each patient's face while only having two frame sizes helps streamline fitting time and SKU management.

AirFit N30i highlights

Quick-release elbow allows for easy disconnection. The pinch-clip elbow stays attached to the tubing to ensure parts do not get stuck or lost.

SpringFit frame automatically adjusts to different facial profiles, helping provide an accurate fit the first time.

Top-of-head design gives patients the freedom to sleep in any position and closer to their bed partner.

Soft sleeves designed for added comfort and reduction in facial marks.

Curved cradle cushion is designed to provide a comfortable, stable seal that is less obtrusive.
