

Tools Required: None
Log bracket not needed

Step 1: After Unwrapping the log set, you'll notice there are three different sized logs.

Step 2: Remove the firebricks from behind the brick retainer. If the bricks have yet to be installed, do not install them.

Step 3: Place the largest of the three logs into the Brick Retainer. The Brick Retainer will fit in the slot on the bottom of the log, and the two "stubs" will rest on the flame guide.

Step 4: Next, the middle sized log will lay on top of the large log

Step 5: The smallest log will lay on top of the middle creating a stack of logs behind the fire.
