HUNTING BLIND GEAR CONSOLE INSTALLATION INSTRUCTIONS

INSTALLATION IN FIBERGLASS BLINDS

STEP 1: Position the Gear Console in the desired location.

NOTE: When installing in a Fiberglass Blind, make sure you check the clearance of all surrounding doors, windows, shelves, etc. If desired, use a level to determine cantor.

STEP 2: Using a 1/4” diameter drill bit, drill (2) holes through the side of the Gear Console as well as the fiberglass blind.

NOTE: Make sure to drill your holes on the top-half portion of your Gear Console, as illustrated in Figure 11.1.

Figure 11.1

STEP 3: Install a flange bolt through the hole from the interior of the blind, and secure using a flange nut on the exterior of the blind.

NOTE: If the Gear Console is installed in a hunting blind other than a Redneck Hunting Blind, a longer bolt may be required. If desired, a silicone caulk or some sort of sealant may be applied to hole opening.

STEP 4: After both flange bolts have been installed, tighten securely with wrench.

STEP 5: Place both pieces of foam on their shelf locations.

Your Gear Console is now installed and ready for use.

INSTALLATION IN SOFT SIDE BLINDS

STEP 1: Install the (2) ACCESSORY BRACKETS “I”. With (2) 1-1/4” BOLTS & (2) WING NUTS, attach the (2) ACCESSORY BRACKETS “I” to (1) HORIZONTAL WINDOW BRACE “E”, as illustrated in Figure 12.1.

STEP 2: Position the Gear Console against the support brackets and mark the back side for proper drilling.

STEP 3: Using a 1/4” diameter drill bit, drill (2) holes through the side of the Gear Console.

NOTE: Make sure to not drill your holes through the Gear Console while against the brackets or cover to prevent any punctures of your soft side blind cover.

STEP 3: Install a flange bolt through the hole from the interior of the blind, and secure using a flange nut on the exterior of the blind.

NOTE: If the Gear Console is installed in a hunting blind other than a Redneck Hunting Blind, a longer bolt may be required. If desired, a silicone caulk or some sort of sealant may be applied to hole opening.

STEP 4: After both flange bolts have been installed, tighten securely with wrench.

STEP 5: Place both pieces of foam on their shelf locations.

Your Gear Console is now installed and ready for use.

Parts Included:
(1) Hunters Console
(1) Hardware Kit

Hardware Included:
(2) 1/4” x 1” Flange Bolt
(2) Foam Liner
(2) 1/4” Flange Nut

Tools Required (Not Included):
Drill
Drill Bit - 1/4” Diameter
(2) 7/16” Wrenches
Marker
