**REDNECK BLIND CAMERA MOUNT INSTALLATION INSTRUCTIONS**

**STEP 1:** Position the Camera Mount in the desired location. The Camera Mount can also be installed on the outside (exterior) of your blind. Exterior installation can be used for trail camera or video camera mounting.  
**NOTE:** Make sure you check for clearance of your Camera Mount and windows.

**STEP 2:** Hold the base bracket in the desired position and mark the hole locations.

**STEP 3:** Using a 1/4” diameter drill bit, drill (4) holes through the side of the blind.

**STEP 4:** Place the Brase Bracket of the Camera Mount in your desired location on Interior (Option A) or Exterior (Option B) of the blind. Then install a hex bolt and flat washer through the hole, from the exterior of the blind, and secure using a flat washer, lock washer, and hex nut on the interior of the blind, as illustrated in Figure 11.1

**NOTE:** Opening the side windows and reaching through the opening will allow access to the outside of the blind.

**STEP 5:** After all (4) hex bolts have been installed, tighten securely with wrench. Your Camera Mount is now installed and ready for use.

**NOTE:** Each Redneck Camera Mount comes with a 3/8” thread adapter pre-installed on the 1/4” standard thread. For most cameras, unthread the 3/8” thread adapter so you can easily mount your camera to your device as illustrated in Figure 12.1
