REDNECK BLIND HUNTERS CONSOLE INSTALLATION INSTRUCTIONS

STEP 1: Position the Hunters Console in the desired location.
**NOTE:** Make sure you check the clearance of all surrounding doors, windows, shelves, etc. If desired, use a level to determine candor.

STEP 2: Using a 1/4” diameter drill bit, drill (2) holes through the side of the Hunters Console as well as the blind.
**NOTE:** Make sure to drill your holes on the top-half portion of your Hunters Console, as illustrated in Figure 11.1.

![Figure 11.1](image)

STEP 4: Install a flange bolt through the hole from the interior of the blind, and secure using a flange nut on the exterior of the blind.
**NOTE:** If the Hunters Console is installed in a hunting blind other than a Redneck Hunting Blind, a longer bolt may be required. If desired, a silicone caulk or some sort of sealant may be applied to hole opening.

STEP 5: After both flange bolts have been installed, tighten securely with wrench.

STEP 6: Place both pieces of carpet on their shelf locations.

Your Hunters Console is now installed and ready for use.
