MARGARET RIVER

Vintage Report | 2022

An extraordinary season is the phrase that best sums up season 2022.

The South-West of Western Australia experienced one of the hottest springs on record with an intensive long stretch of hot days and unseasonal warm nights, including four consecutive days above 40°C over the Christmas period. The timing of this heat wave was at a critical time in the cycle of the early maturing varieties such as Chardonnay and, to a lesser extent, Sauvignon Blanc and Semillon.

Chardonnay yields were severely affected across the region but most seriously at Hay Shed Hill and other dry grown vineyards. We had potentially set a good crop at Hay Shed Hill but this four-day period and the follow up weeks compromised the weight of the bunches so that the end yield was estimated to be less than 30% of expectation. Such is farming. Qualitatively we have no complaints with the wine now in barrel maturing well.

Sauvignon Blanc and Semillon came in at significantly lower yields than expected but much better than Chardonnay. Red grapes were largely unaffected by the heat wave as they were immature in development at that time.

Abruptly in late January the weather changed dramatically with an extreme fall in day and night temperature and with consistent rain events passing through with early Autumnal-like conditions. This cooler weather benefited the red grapes, especially Cabernet Franc, Cabernet Sauvignon and Malbec allowing slower development and therefore greater flavour and colour maturity.

The outcome of 2022 is a high quality low yield harvest out of Margaret River.
