**Transport  
Chairs**

*Transport wheelchairs are designed specifically for transporting a person from one place to another. Most of our transporters have swing-away leg rests, fixed armrests, and side panels. Instead of the usual 'large back – small front' wheels typical of most wheelchairs, Transport chairs have four small wheels providing less drag for easier pushing. Transport chairs are not meant to be user operated.*

From simple and functional transport chairs to luxury recliners, we have it all. Choose from a wide range of transport chairs to specifically suit your needs.

All of our transport chairs come with locking rear wheels to prevent undesired rolling. Many of our transport chairs also come with variable braking systems, which can be controlled by the caretaker.

All of our transport chairs conveniently fold for storage when not in use.

S-Shaped seat frame contours to the human form, providing a comfortable seating position. This S-Shape design also provides anti-thrust, which prevents the user from sliding forward during a quick stop.

Transporters are available in a standard 18" / 19", and most are also available in a narrow 16" / 17" seat width.

Tested in extreme conditions to ensure quality as well as safety.

## OUR TRANSPORT CHAIRS:

### T-2700:

One of our basic versatile wheelchairs with detachable steel armrests. Lightweight and reliable!

### LT-2000:

One of our lighter chairs thanks to an aluminum frame and simple design. Only 19 lbs!

### LT-1000:

Similar to the LT-2000 with the addition of bigger rear wheels for a smoother ride, and pushgrip mounted hand breaks for quick controlled stops. And it comes in blue!

### S-115TP:

Transport chair version of the ERGO S-115. Comfort and safety come standard on this high-end lightweight transport chair.

### ERGO Lite:

What do you get when you combine 3 stage handbrakes with an ultra light 19 lb aluminum frame and Ergonomic seating? You get the ERGO Lite, one of our best selling transport chairs.

### T-2000:

Cheaper alternative to the LT-2000, uses steel frame instead of aluminum. Perfect for those who just need a simple and strong transport chair.

### T-900:

Our deluxe steel bariatric transport chair. High strength steel frame supports up to 450 lbs! Comes with padded detachable armrests and beefy 12.5 inch rear tires.

### TV-10B:

Designed as a travel chair. Quick folding and ultra-compact. Highest weight-to-strength ratio weighing only 18 lbs and holding up to 225 lbs.

### KM-2020:

Aluminum Lightweight flip-back-arm Transport Wheelchair. Includes velcro leg straps.

### MVP-502-TP:

The first of our high-end series of comfort transport chairs. Reclining backrest, reclining footrests, and heavily padded seat are all standard on this transport chair.

### VIP-515-TP:

Designed for users who will be spending lots of time in their chair. Uses center-of-gravity weight shifting tilts the whole chair to prevent the onset of bedsores. The paint also includes anti-bacterial finish to keep the chair safe over long-term use.

### KM-5000 TP:

The ultimate luxury chair. Fully reclines to a horizontal angle, and features fully padded support from head to ankles.
