

November 2001

FOR IMMEDIATE RELEASE FROM Pro8mm by Super8 Sound

THE FIRST ANNIVERSARY OF OUR LONDON OFFICE

Pro8mm by Super8 Sound announced the opening of our new office in London in November of 2000. The expansion was designed to better meet the Euro demand for product of our Pro8mm negative film stocks, processing and telecine. Company president Philip Vigeant appointed Giles Musitano, author of three editions of **The Super8 Guide** and experienced Super8 cameraman to run the new operation.

Located adjacent to SOHO, the opening has met with an overwhelming response from clients such as the BBC, Windfall Productions, Blakeway Associates, Darlow Smithson Productions, LWT (London Weekend Television), Optomen Television Productions, Tiger Aspect Productions as well as dozens of independent filmmakers.

Film is shipped to corporate headquarters in Burbank, CA every Wednesday for processing and telecine. A Betacam SP Pal and Mini DV Pal are among the full service telecine options that we can transfer to from Pro8, Regular8, Super8, Single8, 16mm, Super16, 35 and Super35mm film formats. Film is usually available for pick up in London on Monday. This incredible 3 working day turn around offers more efficiency than any local UK labs can offer their clients in the 8mm format.

The office is open Monday through Friday, 9:00 AM to 6:00 PM.
Pro8mm LTD, 1/6th Falconberg Court, London, England W1D3AB
