

# Doctor's Pocket-Sized Microcurrent Treatment System

***"Quick-Relief"***  
**Method**

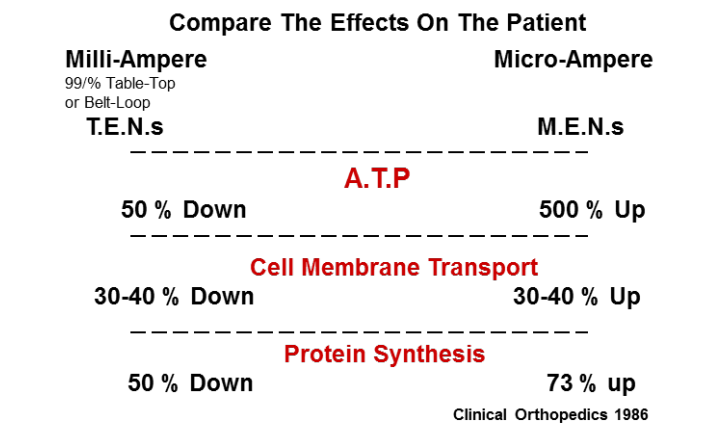

**Headaches**  
**Neck Tension**  
**Back Pain**

***Clinically Strong - Patient Friendly***

- **Why would a doctor or healthcare practitioner want to use this instrument?**
  1. Because it's fast relief, results in just one or two minutes.
  2. Patients feel a difference immediately! No need to wait to see if it works.
  3. Micro current it's not just pain control but helps to balance and heal the body.
- **What makes this so different from all the other instruments out there that are used to treat pain control?**
  1. There are no wires to connect to the patient
  2. It is very portable, you can carry it in your shirt pocket.
  3. The simplicity of treatment means you can treat anyone, anywhere, any time.
- **There are T.E.N.s units available, why can't I just use those to treat the patient?**

Tens units have been used for many years, but research shows there is a big difference when treating a patient, please note that charts below.

**5 `Other Healing Factors That Occur With "Microcurrent"**

- **1 FIBROBLASTIC ACTIVATION**
- **2 DNA SYNTHESIS**
- **3 T-LYMPHOCYTE ACTIVATION**
- **4 INSULIN BINDING**
- **5 CALCIUM CHANNEL OPENING**

Cell Physiology" 1989

- **What health problems can be treated with this instrument?**

Almost all parts of the body can be treated, the most outstanding effects are for:

--- Headaches ---    --- Neck Pain And Tension ---    --- Low Back Pain ----
- **How long will it take me to learn how to use this instrument for my patients?**

You will get results the very first time that you use, there is nothing complicated about it, no wires to tangle or trip on, no probes to poke them with, no shocking the patient. Treatments are painless , The most that is felt is like a mild tickle and 'relief'.
