PowerCON® TRUE1 Compatible + DMX Combo Cables

Replace Individual Power/DMX Cables

Make your outdoor lighting setup simpler and cleaner with Cool Cables™ IP65 rated powerCON® + DMX combo cables. They can replace any set of individual power and DMX extensions with a single neatly wrapped cable. They come in various lengths, with 3-pin or 5-pin XLR connectors, and can be used to link the power and data of any equipment with DMX and powerCON® TRUE1 connections. The power cable features heavy-duty 14AWG wire, and is fitted with locking powerCON® compatible input/output connectors.

Weatherproof Connectors

The DMX cable is the perfect solution for linking up all of your outdoor lighting fixtures with IP65 rated connectors. They are high quality cables made specifically for outdoor lighting applications, and they meet the USITT standards for DMX512 cable specifications—120 ohm impedance, low capacitance, and double (foil and braid) shield. Finally, both power and DMX cables are encased together in a highly flexible outer jacket with heat shrink.

Warranty

- Limited lifetime warranty

**Nearly all of us will need to face cancer in our lifetime, either personally, or through a loved one. We're trying to help. We know it's not much, but a portion of the profits from these cables is donated to help fund ongoing cancer research.*
