cool cable™

PowerCON® Compatible + DMX Combo Cables

Replace Individual Power/DMX Cables

Make your lighting setup simpler and cleaner with Cool Cables™ powerCON® + DMX combo cables. They can replace any set of individual power and DMX extensions with a single neatly wrapped cable. They come in various lengths, with 3-pin or 5-pin XLR connectors, and can be used to link the power and data of any equipment with DMX and powerCON® input/output connections. The power cable features heavy-duty 14AWG wire, and is fitted with powerCON® compatible input (blue) to output (white) connectors on either end.

Reliable Data Transfer

Its DMX cable offers 120 ohm impedance, low capacitance, and a double (foil and braid) shield. On either end of the cable are high quality XLR(M) to XLR(F) connectors. And like all Cool Cables™DMX cables, they offer reliable data transfer through their data-specific design and wire that is wrapped 5x tighter than any traditional XLR cable. Finally, both power and DMX cables are encased together in a highly flexible outer jacket with heat shrink.

Warranty

- Limited lifetime warranty

**Nearly all of us will need to face cancer in our lifetime, either personally, or through a loved one. We're trying to help. We know it's not much, but a portion of the profits from these cables is donated to help fund ongoing cancer research.*
