RAZIMUS JEWELRY CUSTOM FABRIC GUIDE

*What fabrics work best
for custom fabric jewelry?*

Woven Fabrics:

Woven fabrics are formed by interlocking threads at right angles, or warp & wefts.

These fabrics typically do not have stretch and are made of a variety of fibers including but not limited to cotton, wool, polyester, silk, satin, and linen.

Examples:

WOVENS THAT WILL WORK:

**Oxford shirts, ties, satin dresses
handkerchiefs, quilting cottons,
bandannas, blazers, denim & chinos**

WOVENS THAT WILL NOT WORK:

**woven lace, sheer fabrics, loosely woven
fabrics like sarape, fabrics with fused
interfacing, beaded or embroidered fabrics**

CUSTOM FABRIC GUIDE

WHAT TO KNOW ABOUT KNITS

Knit fabrics come in many varieties.

The **knit fabrics with two-way stretch, like those found in t-shirts** work in our fabric jewelry designs due to the way the fabric construction is interlocked. Two-way stretch fabrics will only stretch in one direction, vertically or horizontally.

However, other knit fabrics like sweaters, lace, spandex or lycra, mesh, piled knits like fleece or velour, and handmade knit fabrics do not work in our custom designs because the construction of the fabric unravels when we cut it, due to the way the threads lock.

Examples:

KNITS THAT WILL WORK:

T-shirts

Onesies

Jerseys

2-way stretch fabrics

KNITS THAT WILL NOT WORK:

Handmade knit scarves & hats

Sweaters

4-way stretch fabrics

Sheer stretch fabrics
