

A GUIDE to FABRIC STRIPS FOR PIPING – single & double

First of all please watch my Tutorial on How to Make Up Piping –
the following details will then make more sense!

When using a whole width of fabric –

i.e. somewhere between 1m 32cm - 1m 48cm (52 – 56 inches) wide cut on the bias / cross:

A 1m 50cm length of material will make up a strip 2m long

A 1m 70cm length of material will make up a strip 2m 15cm long

2m 25cm length of material will make up a strip 2m 60cm long

2m 40cm length of material will make up a strip 2m 80cm long

And finally! –

2m 65cm length of material will make up a strip 3m long

Any longer and it really must be a huge piece of furniture and is too wasteful of fabric so join lengths together – or make up a 'Piping Sleeve' – a video is available for this.
