Liability Insurance

Processed Food Vendors must have valid liability insurance certificate on file with their application. There are many insurance companies to choose from. The important thing is to make sure you have the proper insurance for your business type and that you keep it up to date.

Non-processed food vendors who choose not to self-insure must note that the Market's liability insurance is **not** a blanket policy for its members and the Market is not liable for vendor damages arising from negligence, vendor products or actions.
