# At-Home UGG Size Guide
US Letter Size

## Setting Up Your Size Guide

**You'll need:** Letter Size paper, a printer, sticky tape, and a ruler.

**Print out your guide.** Ensure the print settings for the document are adjusted to "Actual Size" proportions or equivalent.

**Tape your two paper sheets together.** Ensure the scale lines on **both sides** of the page measure **12 Inches** when joined, and the scale on the **bottom left corner** measures **2 Inches**. This will indicate your pages have been printed and attached at the correct scale to find your perfect fit.
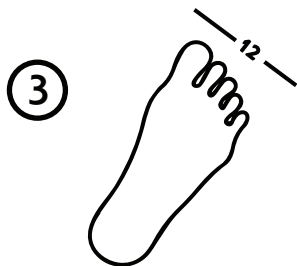

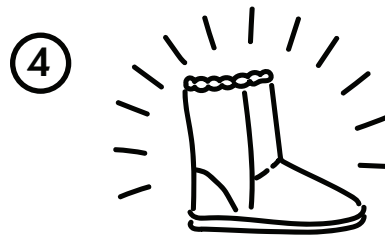

## Finding Your Perfect Fit

① Lay your size template flat on the ground. A flat surface will work best. Remove any footwear and/or socks.

② Place the heel of your foot in line with the black line on the size chart marked below. Stand up, and ensure your foot is flat on the chart.

③ Locate the black line in front of your longest toe. The size marked on that line is your correct size.

④ Order your new pair of UGGs tailored to the perfect fit.

*If you are choosing a slipper or a slide, please check the Size & Fit recommendations on the product page.
