

Setting Up Your Size Guide

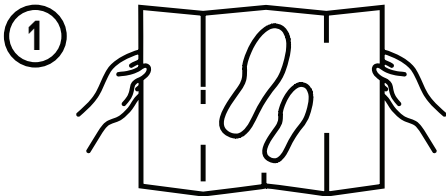

You'll need:

A4 paper, a printer, sticky tape, and a 30cm ruler.

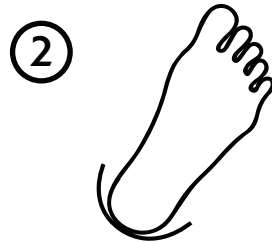

Print our your guide. Ensure the print settings for the document are adjusted to "Actual Size" proportions or equivalent.

Ensure the scale line on the right side of the page measures 20cm. This will indicate your page has been printed at the correct scale to find your perfect fit.

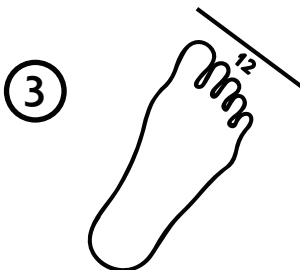

Finding Your Perfect Fit

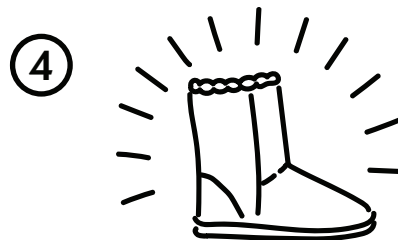

Lay your size template flat on the ground. A flat surface will work best. Remove any footwear and/or socks.

Place the heel of your foot in line with the white line on the size chart marked below. Stand up, and ensure your foot is flat on the chart.

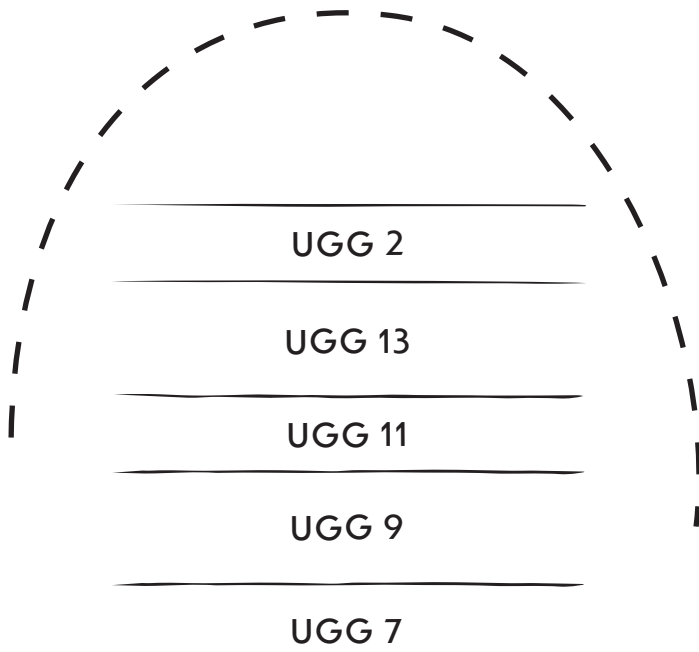

Locate the white line in front of your longest toe. The UGG size marked under this line is your correct size.

Order your new pair of UGGs tailored to the perfect fit.

*If you are choosing a slipper or slide, please check the Size & Fit tab on the product page.
