8" & 12" Corner Shelf Install Guide 🚄 🗛

HELPFUL HINTS:

Tools/Supplies:

Level
Pencil
Painter's Tape
Caulking Gun
Sponge
Clean Cloth
Drill
Phillip's Head Screwdriver
Fine Grit Sandpaper

- 1) Thoroughly clean the surface on which the shelf will be adhered.
- 2) Plan height for installation of the shelf. Dry fit the shelf and sand the back edge as needed to allow for a good fit.
- 3) You can install the shelf with silicone or the screws included:
 - a) **Silicone Installation**: Apply silicone to the back edge of shelf and press firmly in place applying even pressure. You may use painter's tape to help hold it in place while it dries. Allow to dry for 24 hours.
 - b) Screw Installation: First, place your shelf in desired location. Use a pencil to mark the mounting holes. Next, drill out the pilot holes. Insert the anchor through pilot holes, apply silicone to back edge of shelf and then screw shelf to wall.
- 4) Once silicone has fully cured, apply a bead of silicone caulk around the perimeter of the shelf to seal out water. Use a wet finger to smooth the caulk and then clean off excess with a damp sponge.
- 5) Allow to fully dry before use.
- > When figuring out the "proper" height for your shelf, it's a good idea to consider everyone that will use the shower.
- > Periodically check the silicone and caulk for any wear or deterioration and correct as necessary.

Soap Dish Install Guide

Tools/Supplies:
