DRAIN ASSEMBLY

Move your new bathtub to a location that will not be damaged by water run-off. A driveway or patio is suitable for testing your bathtub.

We recommend that you install the waste & overflow onto the bathtub at this time.

This will help with water testing your new bathtub, these parts are highlighted in *Red*.

American Bath Factory recommends having a certi ied plumbing technician install your bathtub.

1

Safety Instructions

- DANGER! To reduce the risk of injury, do not permit children to use bathtubs unless they are closely supervised by an adult at all times.
- Use this bathtub only for its intended use as described in this manual. Do not use attachments not recommended by the manufacturer.
- Do not attempt to plug in or unplug the electrical devices (including the bathtub) while in or near a filled bathtub. Never use or handle electrical devices while in or near a filled tub.
- Never drop or insert any objects into any openings.
- Only healthy adults should use the bathtub when the water temperature is between 100° and 104°F (38°-40°C). Any temperature below 100°F is considered safe for longer durations (exceeding 10 - 15 minutes) or for young children. The water temperature in a bathtub should never exceed 104°F (40°C).
- Excessive water temperatures have a high potential for causing fetal damage during the early months of pregnancy. Pregnant or possibly pregnant women should limit bathtub temperatures to 38°C (100°F).
- The use of alcohol, drugs, or medications before or during bathing may lead to unconsciousness and the possibility of drowning.
- Use of this bathtub may cause drowsiness and changes in heart rate and/or blood pressure. Persons suffering from obesity, who have a medical history of heart disease, low or high blood pressure, circulatory problems, or diabetes should consult a physician before using. Persons using medications should consult a physician before using this bathtub.

!! IMPORTANT !!

Your bathtub is a DOUBLE WALL construction. The drain needs to be installed with

SILICONE, not Plumber's Putty!

Apply a liberal amount of "kitchen and bath" type silicone (available in most Home Improvement or hardware stores) to the drain threads and a bead on the underside of the Drain Flange (See Fig. 1). Insert the Drain through the drain hole, screw into the Waste Pipe and verify that the rubber gasket is seated properly between the bottom of the tub and the Waste Pipe. The handles of a pair of pliers can help you screw the Drain securely into the Waste Pipe (See Fig. 2) Wipe off any excess silicone around the drain with a clean, dry cloth.

Allow 24 hours for the Silicone to cure completely before adding water to the bathtub.

If everything is sealed and dry, fill your bathtub 3/4 of the way and check for leaks. After the water test is complete and there are no leaks, proceed with installing your bathtub.

Fig. 1 - Securing Your Drain

ALIGN & SECURE YOUR BATHTUB

Now that the water test is complete, pay careful attention when transporting your clawfoot bathtub through a narrow doorway. Tilt your bathtub on its nose, on to a soft surface (folded towel, sheet, etc.), and spin it through the doorway. We recommend doing this instead of disassembling the feet.

Carefully align your bathtub over the water supply stubs and drain. For deck or tub mounted faucets, it may be helpful to temporarily attach your faucet and water supply lines to the bathtub, to aid in aligning the bathtub directly over the water supply stubs.

Securing Your Bathtub

Failure to secure your bathtub will void your warranties! It is very important to secure your bathtub to the floor. This avoids bending or straining the water supply connections and drain, if the bathtub is bumped or moved, possibly

and drain, if the bathtub is bumped or moved, possibly causing leaks.

There are several methods for securing your bathtub to the floor depending on the type of flooring the bathtub is sitting on. The simplest methods are to use (a) readily available rubber non-skid furniture pads (secured to the floor with screws or glue) under each foot, or (B) a small amount of glue or epoxy directly on the floor under each foot.

WARNING - Failure to secure your bathtub may cause leaks if the bathtub is moved.

The preferred method © (refer to steps 1-3 below) is to fix dowels or pins in the floor for each bathtub foot. Once your bathtub is secured, shim, if necessary, to ensure your bathtub does not rock and your tub is stable and level.

INSTALLATION SPECIFICATIONS

Cleaning & Maintaining your Bathtub

Your bathtub's surface is very easy to clean. There are no pores for dirt to penetrate, so dirt will just rinse off with water. For sanitary purposes, you should occasionally clean your bathtub with non-abrasive soap and water when possible. Avoid harsh chemicals. Dish washing detergent such as JOY*, PALMOLIVE*, IVORY*, etc., is all that is required. If you spill something on the bathtub and need a stronger cleaner, the following are SAFE to use: GEL GLOSS*, TACKLE*, TOP JOB*, FORMULA 409*, WINDEX*, CLOROX BLEACH*, GLASS PLUS*, LIQUID COMET*, SOFT SCRUB*, and SPIC & SPAN POWDER*.

IMPORTANT

DO NOT CLEAN YOUR BATHTUB WITH GOOF OFF', SCRUBBING BUBBLES', LYSOL DISINFECTANT SPRAY', DOW DISINFECTANT BATHROOM CLEANER', PINE-SOL', WHITE-CAP', LES TOLL', PAINT THINNER', ACETONE', LACQUER THINNER, M.E.K.

or other chemicals that attack the structural integrity of plastic (including, but not limited to acetones). Use of these chemicals will destroy the acrylic surface of your bathtub.

USE OF THESE CHEMICALS WILL VOID YOUR WARRANTY

If you should dull, scratch, or chip your bathtub, the appearance can be restored to it's original look. Scratches and dulling can be removed with a liquid polish such as Gel-Gloss*. Deep scratches or burns can be removed by using very fine sandpaper (600 grit or higher) and finished with a liquid polish

5

- (A) The faucet holes (where the supply lines are placed) are located 1 1/2'' in from the edge.
- (B) The drain is located 2" inches in from the edge of the bathtub.

Note: Do not use the measurements for the Deck Mount listed above if you purchased a Wall Mount, Floor Mount, or Inside Bathtub Mount faucet.
