CHHEANG SREYLENG

MAJOR: Information Technology

GRADE AVERAGE: 74%

Sreyleng is 18 years old. Thanks to the support of Kandila Company, she is studying Information Technology (IT) at Passerelle Numeriques Cambodia (PNC) located in Phnom Penh. She lives in a female dormitory off the campus specifically set up for first year students.

Both of Sreyleng's parents are farmers and she has four siblings. If she had not received this scholarship, Sreyleng thinks that she would have had to work with her parents or in a factory.

Sreyleng's grades in school have continuously improved since she began Module 1. Her favourite subjects are HTML, OS, Algorithm, and English. When she is not at school or studying, she enjoys reading news and information about technology and listening to music.

Sreyleng is very interested in acquiring knowledge related to modern technology. She hopes that her education at PNC will help her to achieve her future purpose. When she grows up, she wants to be a programmer and wants to run her own business.

CHHEAN DANY

MAJOR: Information Technology

GRADE AVERAGE: 82%

Chhean Dany is 18 years old. With the scholarship she received through Kandila Company's donation, she is now studying Information technology (IT) at Passerelles Numeriques Cambodia (PNC).

Dany is living in a dormitory off campus. She lives with four other young women. They spend a lot of time together and share tasks like cooking and cleaning their shared home.

Before coming to PNC, Dany was living with her parents and two younger sisters in a remote Cambodian village. Dany joined a lot of activities within her community such as campaigns, teaching poor children and cleaning the environment.

Now, at PNC, she is ranked number 8 in a class of 25 students. In her free time, she likes reading books, talking with friends, and doing homework. Her favourite subjects are English, HTML, Maths and Professional Life. She says that English is a very important skill for her to have and it will help her when she enters the job market. She has also learned a lot from her Professional Life classes and feels that these lessons will help her to improve her future professional career.

Dany says "Education will help me to achieve my goals, to have a good job and become a better person. In the future I want to be a programmer and continue studying at university after I graduate from PNC. If possible, I want to run my own business".

STEM4Women - Students at PNC

In addition to the material covered in the curriculum at PNC, Dany and Sreyleng have also participated in group activities to help them adjust to their new school and provide them with further life skills. Some of these activities include: mentoring sessions, integration days, inspiring quotes and creativity workshops, self-awareness workshops, stress management workshops, aerobics and sports. These activities and more are included as part of the PNC experience to ensure that students are receiving a well-rounded education which prepares them for life after graduation.

"When women thrive, all of society benefits."
