

Dear Customer,

**Congratulations** on purchase of the Tata Swach Insta Sip Instant Water Purifier.

**Pure and Safe drinking water instantly :**

- ❖ The Tata Swach Insta Sip Instant Water Purifier purifies water up to **1000 litres** \*\*
- ❖ Recommended life : 1 year
- ❖ Protects against bacteria & cysts\*\*
- ❖ Reduces plastic waste of nearly 1000 one-litre bottles<sup>+</sup>

**Cleaning and handling instructions :**

- ❖ The Tata Swach Insta Sip Instant Water Purifier removes several contaminants that other ordinary water filters may leave behind. Remember that the most harmful waterborne contaminants are not visible to the naked eye. As a result, you may find that in some water conditions, this superior technology cartridge chokes up faster than expected. If it happens to your product, please be rest assured that you and your child have been saved from several invisible disease-causing contaminants. Kindly discard the bottle once the cartridge chokes.
- ❖ Please do not use sharp objects to scrape the cartridge, because doing so may damage it.
- ❖ Clean the Tata Swach Insta Sip Instant Water Purifier with lukewarm water (Fill the bottle half, close the cap and shake thoroughly two to three times, then open the cap and drain the water).
- ❖ The spout (mouth piece) should also be cleaned periodically with luke warm water.
- ❖ Do not use detergents or bleach or cleansers containing chlorine or any chemical to clean the Tata Swach Insta Sip Instant Water Purifier.
- ❖ Rinse the bottle thoroughly and turn upside down and leave to dry.
- ❖ Do not scrub the outside of the bottle with any hard scrubber, chemical or sharp objects like nails, blades and knives. It might damage the printed label on the bottle.
- ❖ No dishwasher recommended, only hand wash to clean.
- ❖ The Tata Swach Insta Sip Instant Water Purifier comes with a special dust cover which prevents contamination of the spout.

**How to Use :**

1. In order to get safe drinking water, discard the first complete fill by squeezing the Tata Swach Insta Sip Instant Water Purifier.
2. Refill the Tata Swach Insta Sip Instant Water Purifier with water, gently squeeze it, and start enjoying purified drinking water anytime and anywhere.

**Caution :**

- ✦ Do not use the bottle:
  - ❖ For carbonated water or beverages, hot liquids or alcohol;
  - ❖ For milk or baby food.
- ✦ Never use in microwave, conventional ovens or dishwasher.
- ✦ Keep away from heat sources.
- ✦ Fasten cap tightly to prevent leakage while travelling.
- ✦ If damaged in any way, do not use the Insta Sip Instant Water Purifier.
- ✦ Take care not to overfill.

\*\* Under standard conditions : Turbidity : <1 NTU, pH value at 25°C : 6.5 – 8.5, Temperature : 20°C and TDS : 1500

<sup>+</sup> As per usage of 1000 one litre bottles to consume 1000 litres of water
