

removable hands

A

B

C

D

1. Removable hand(s) will come attached to the arm of each form. They are attached with long bayonets (image A, left).

2. If there is a seam at the wrist, this indicates a removable hand. Pull the hand and it will slide out of the wrist fitting. Long bayonet and insert will be visible (image B, left).

3. To insert hand back into wrist, line up the bayonet with the insert and gently push hand back into place (image C, left).

4. Wrist seam should be smooth (image D, left).
