Sample **Sativa THCA 3pk Cart**

Sample ID SD230805-020 (82264)	Matrix Concentrate (Inhalable Cannabis Good)
Tested for Kind Remedies	Reported Aug 10, 2023
Sampled - Received Aug 07, 2023	Unit Mass (g) 3.0
Analyses executed CANX, QARUSH	

Laboratory note: The estimated concentration of the unknown peak in the sample is 9.84%. Currently, PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)-8-THC or (-)-8-THC. At this time there are no reference standards available for (+)-8-THC. (+)-8-THC is a different compound from the main (-)-8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-8-THC and (-)-8-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-8-THC and (-)-8-THC with the majority, if not all, of the concentration being (+)-8-THC. Total (+)-8-THC concentration is estimated to be: 69.90%.
