## Trusted by Vets & Loved By Pets

"I would have to say that this product was the basis of saving my old dog. She had a problem with her spleen and it was time to put her to sleep. She couldn't stand almost lifeless. I decided to keep her at home with me over the next two days to say goodbye.

My friend recommended Oralade and I had a next day delivery arranged. Within 24hrs she was looking around and by the next day was up and walking around.

Vets can't believe it. This product has so much goodness in it and she loved the chicken flavour.

Extremely good value... About to order more."
