

DENTAL PICK SYSTEM: 4 DIFFERENT HANDLES

Dental picks are intended for intraoral use.
There are 4 different handles, corresponding to 4 different angles:

The **0°** Handle can be helpful for the mandibular jaw.

The **8°** Handle is the most often used one (up to 80% of the cases can be solved with it).
Inserts can be used in a backward direction as well (helpful for lower premolars).

The **18°** and **30°** Handles are used for the more caudal teeth.
