

# How to Install your Genesis Water Ionizer

## Genesis Installation Step One: Remove Plugs

Push in the ring while gently pulling out plug.  
You can use a butter knife or flat head screw driver to help  
push in ring.

## Genesis Installation Step Two: Attach Tubes

## Genesis Installation Step Three: Power Cord

## Genesis Installation Step Four: Attach Hose

**Screw in stainless steel hose to the left.**

## Genesis Installation Step Five: Attach Diverter Valve

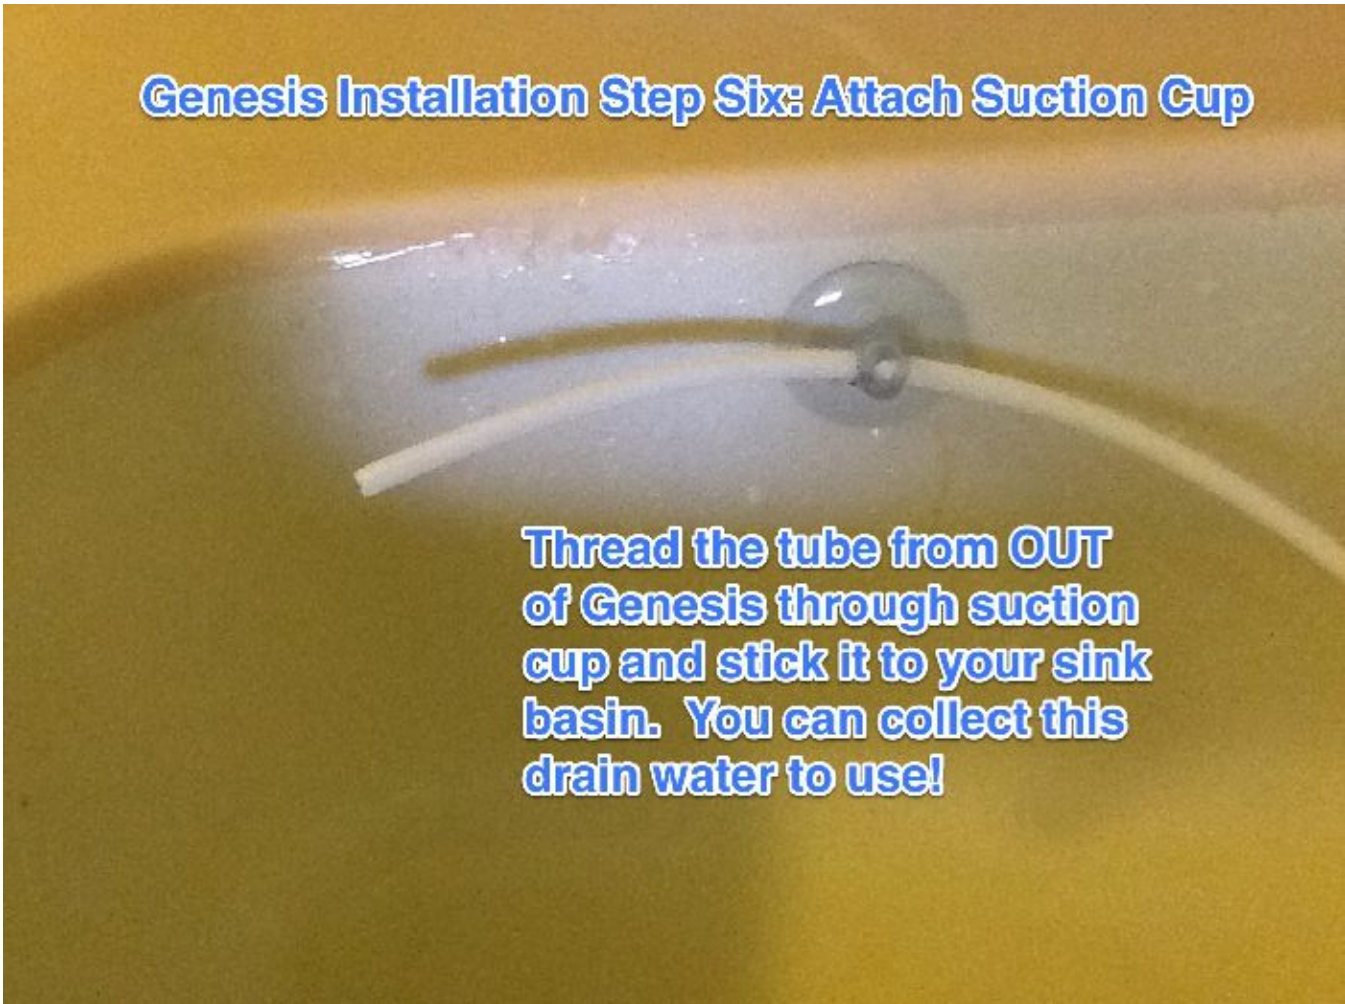

**Remove your faucet aerator by unscrewing to left (you may need pliers).**

**Then attach faucet diverter valve by screwing to right. Use provided male/male adapter if faucet threads are female.**

**Then attach tube from IN of Genesis.**

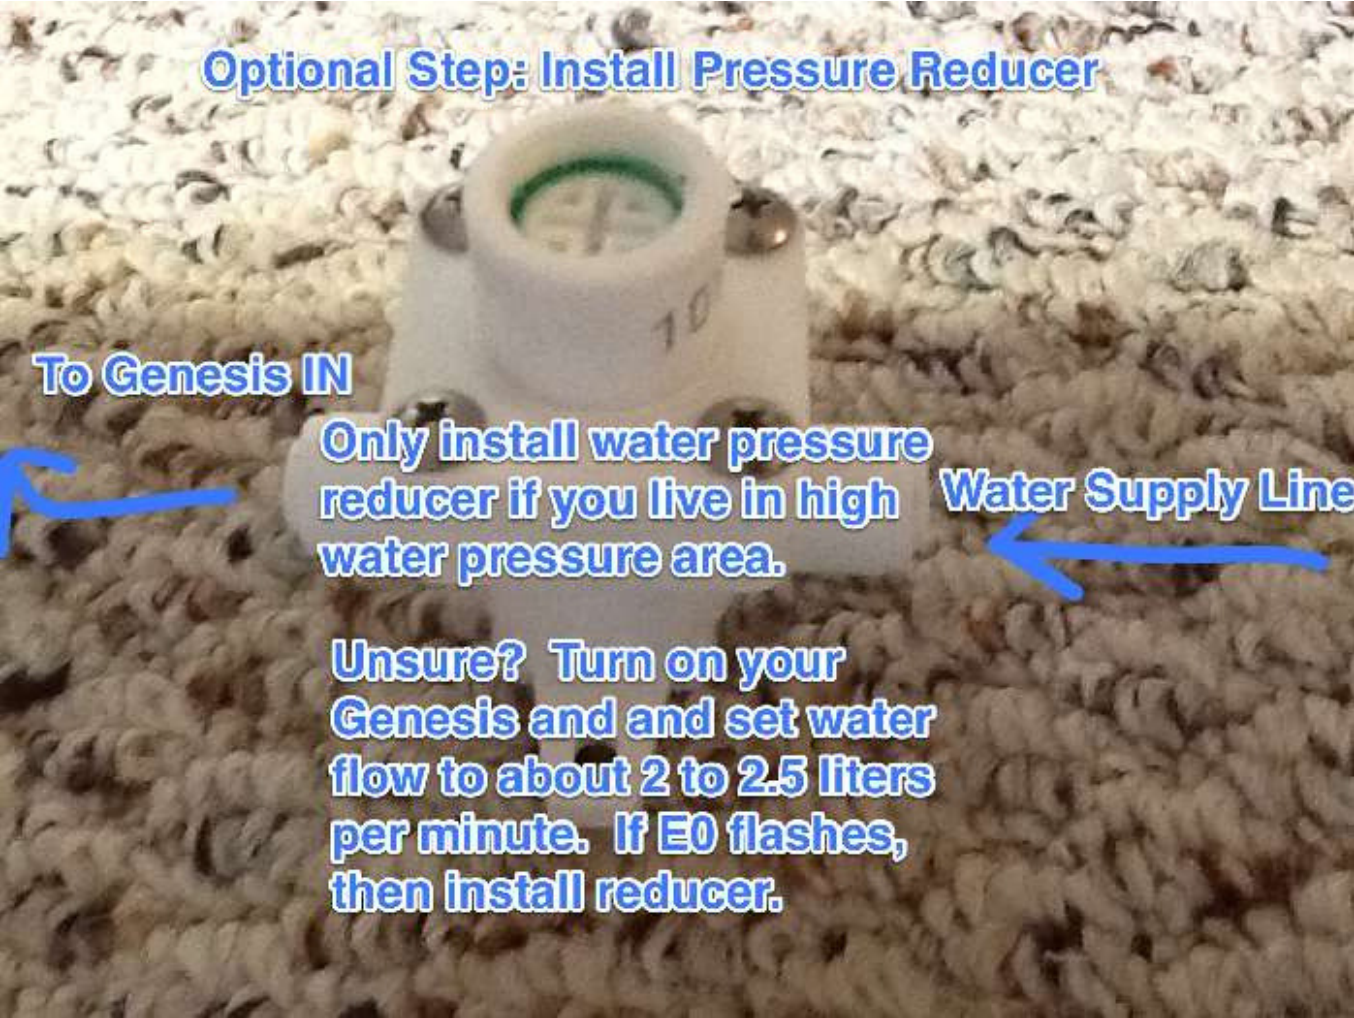

## Genesis Installation Step Six: Attach Suction Cup

Thread the tube from **OUT** of Genesis through suction cup and stick it to your sink basin. You can collect this drain water to use!

## Optional Step: Install Pressure Reducer

To Genesis IN

Only install water pressure reducer if you live in high water pressure area.

Water Supply Line

Unsure? Turn on your Genesis and set water flow to about 2 to 2.5 liters per minute. If E0 flashes, then install reducer.
