

# 2021 F150 MKII TAG LIGHT INSTALLATION

## STEP 1

Locate tag bulb socket by looking under your bumper. Be sure that there is no power going to your Tag lights.

OEM LED Tag Light.

## STEP 2

Twist the socket counterclockwise and pull away from the truck to expose your bulb.

## STEP 3

Remove the stock Tag light by pulling the light away from the socket. If your bulb is glass be careful as this bulb may be hot and be sure not to use too much force when removing the bulb as you do not want to break the glass bulb.

## STEP 4

Insert your F150LEDs.com MKII Tag light bulb. This bulb may require some moderate force for it to install properly.

***Test your bulb to ensure that it is working, if not rotate your bulb 180 degrees.***

## STEP 5

Reinsert your tag light socket back into your housing using a clockwise turn to lock it into place and repeat steps for the other side.
