

2023 FORD F-250 TAILLIGHT BULB INSTALL GUIDE

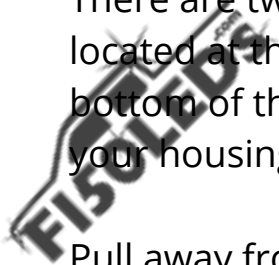

STEP 1

Be sure that there is no power going to your Reverse lights.

Remove two size 8mm bolts from your truck.

There are two tabs located at the top and bottom of the side of your housing.

Pull away from the side of your truck with moderate force to release these tabs

STEP 2

Remove your Taillight sockets from the housing using a clockwise turn.

***the taillight bulbs
are the top and bottom
sockets in the housing***

STEP 3

carefully remove the OEM glass bulb by pulling away from the base of the bulb.

Make sure this bulb is not hot when removing the bulb

STEP 4

Insert your
F150LEDs
Taillight bulb.

*Test your bulb, if
the bulb does not
light then remove
the bulb and rotate
it 180 degrees.*

STEP 5

Repeat these steps for the three other bulbs.

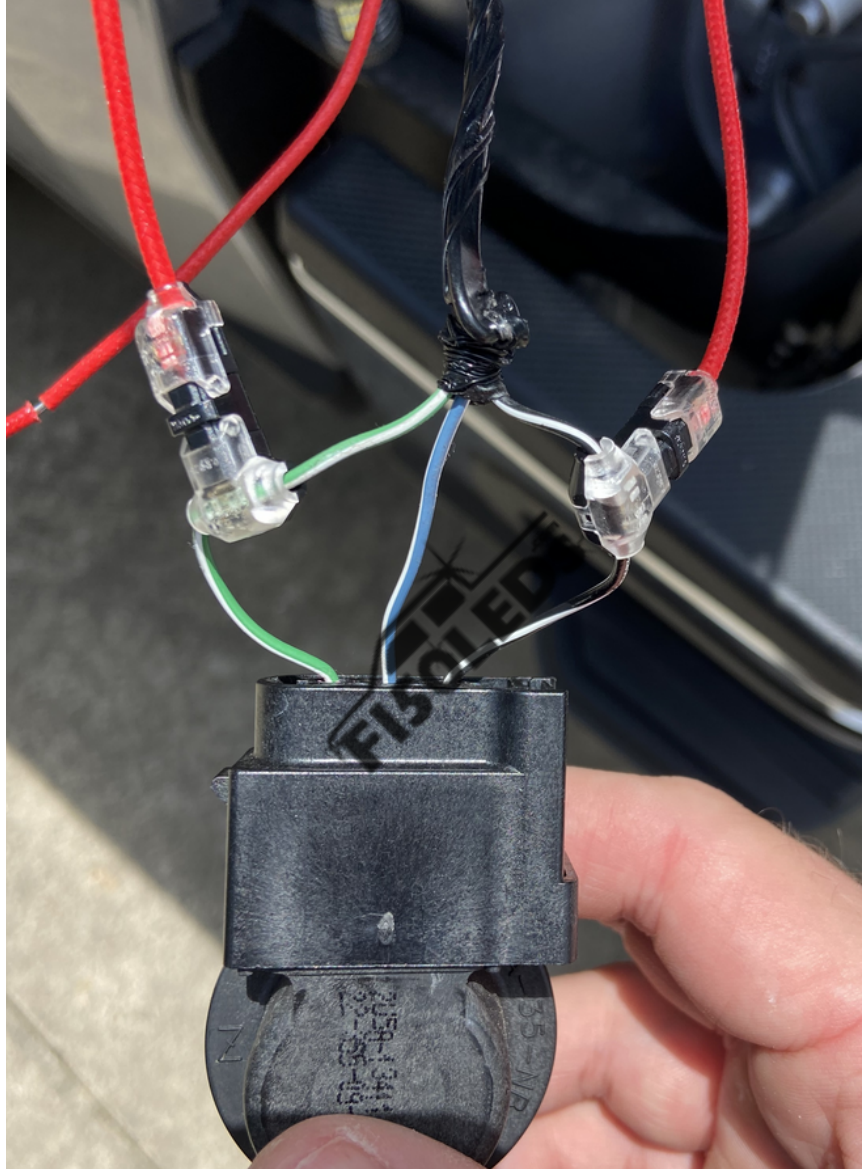

STEP 6

Use the included self-tapping screw to mount the included resistors (two per side)

STEP 7

Use the included T-Taps to splice the two wires coming from the resistors to the two outer wires of the taillight socket (each bulb will need its own resistor)

Repeat this step for the three other bulbs.

STEP 8

Reinsert the bulb back into the housing using a clockwise turn to lock it into place then reinstall your taillight assembly.
