

2019 - 2022 RANGER TAG LIGHT INSTALL

STEP 1

Be sure that your Ranger is off, headlights are off without keys in the ignition and there is no power going to your Tag lights.

Locate tag bulb socket by looking under your bumper.

STEP 2

Twist the socket counterclockwise and pull away from the truck.

Gently pull the bulb out of the socket.

Be sure that the bulb is not hot when removing it.

STEP 3

Insert your F150LEDS.com tag light bulb.

Test your bulb to ensure that it is working, if not rotate your bulb 180 degrees. Reinsert your tag light socket back into your housing using a clockwise turn to lock it into place.
