

THE ALL NEW TITAN II

Removable handle - Helps reduce the packed size. Ergonomic Hi-Flo design with extra wide handles for comfort.

Pressure Gauge: Calibrated for accurate pressure reading. Built into the Airbox so stays stationary when pumping making it easier to read.

Exhaust Lever: Two stage inflation. Simply toggle between single and double chambers when inflating your board.

Hose Connector: Quick and easy attachment with the new double-ended bayonet hose.

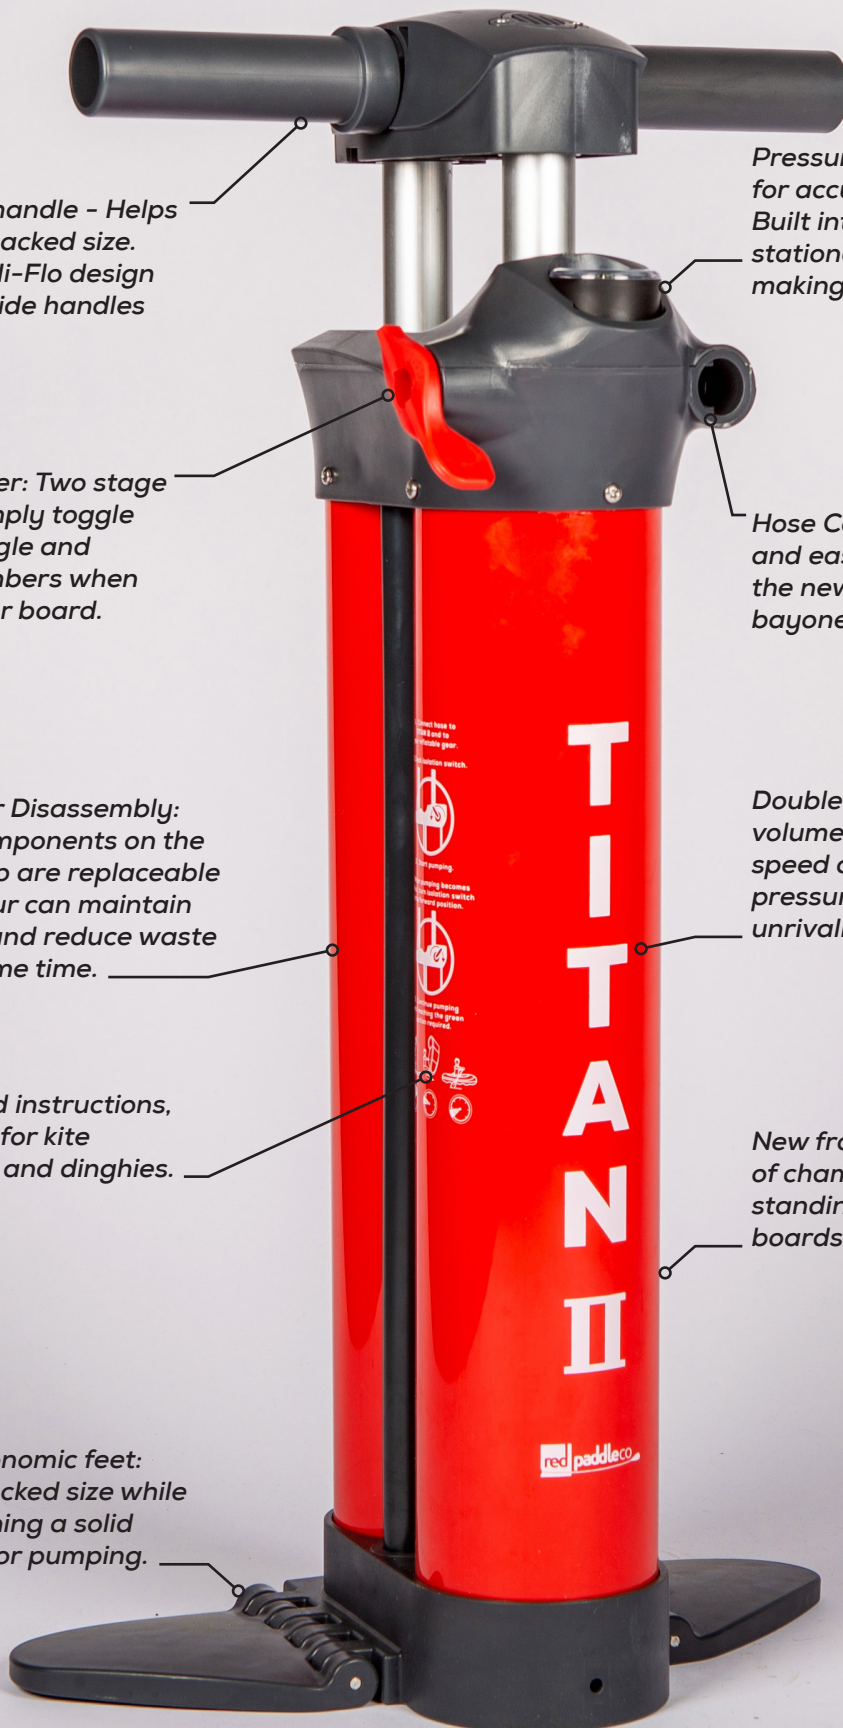

Designed for Disassembly: All of the components on the Titan II Pump are replaceable meaning you can maintain your pump and reduce waste all at the same time.

Double Chambers: High-volume capacity for greater speed and pressure. High pressure chamber for unrivalled performance.

Clear to read instructions, can be used for kite surfing kites and dinghies.

New front to back orientation of chambers shifts the standing position making the boards easier to inflate.

Folding ergonomic feet: Reducing packed size while still maintaining a solid stable base for pumping.
