

BowHaus Sizing Guide

Measure your dog using our directions below; then use the sizing chart to determine which size is right for you and your pet.

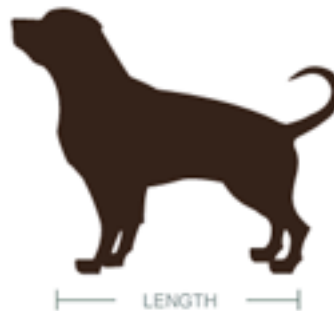

Note: We recommend these sizes based on our experience. Crates are standardly sized so that your dog can comfortably walk in, turn around, and lay down. Also consider your dog's habits and environment: For instance, do they like to sleep curled up or stretched out? Is your climate warm or cool? If you have a puppy, go with the measurements of a full sized breed. And don't forget to check the exterior dimensions to ensure the unit will fit in your home.

1) MEASURE your pet's height while standing.

Measure height
chin to paws

Measure length
chest to rear

**Enter Your Dog's
Measurements Here:**

HEIGHT: _____

LENGTH: _____

2) COMPARE your dog's measurements to the sizing chart below.

SMALL	
For Dog Fitting Purposes
