

HÄFELE LOOX SOUND SYSTEM 420E EXCITER SPEAKERS

Can you imagine life without music? It's simply unthinkable for many of us. Today our favourite songs and playlists accompany us wherever we go; usually stored in our smartphones, tablets or notebooks. Our music is always accessible to us, whether we are wearing headphones while jogging, listening in the car via Bluetooth and of course within the walls of our own home.

The Loox Sound System 420E with Exciter speakers is an invisible sound system that is ingeniously developed to be installed into furniture pieces. A Bluetooth receiver with 2 or 4 exciter speakers fit neatly into the cabinet sending vibrations through different surfaces, transforming every piece of furniture into a sound conductor (speaker).

To make it even smarter, those already familiar with the Loox system have it even easier. The Loox Sound System 420E is designed and built to suit the plug and play Loox Driver. Now you can combine the excitement of sound with the ambience of Loox LED Lights and only have the one driver to install.

For further details on the LOOX 420E sound system please refer over the page.

LOOX SOUND SYSTEM 420E
