HV9101-ZB-5C

zigbee certified product
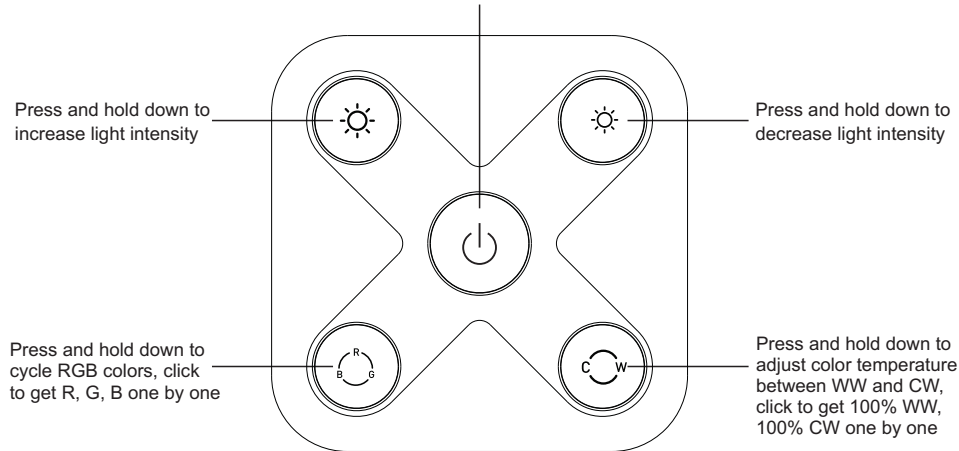

HAVIT Lighting

RGB CCT DIM 3 in 1 Zigbee Remote Controller

*Important:* *Read All Instructions Prior to Installation*
Function introduction

ON/OFF button, click to turn ON/OFF all, press and hold down to search and pair to ZigBee network or factory reset the controller

Press and hold down to increase light intensity

Press and hold down to decrease light intensity

Press and hold down to cycle RGB colors, click to get R, G, B one by one

Press and hold down to adjust color temperature between WW and CW, click to get 100% WW, 100% CW one by one

Note: This remote supports 1 group for binding max. 30 lighting devices.

Front side

CR2430 battery

Back side

Product Data

Operation Voltage	3VDC
Power Supply	3V(CR2430 battery)
Transmission Frequency	2.4GHz
Transmission Range (free field)	30m
Protection Type	IP20
Dimming Range	0.1%-100%

• RGB+CCT+DIM ZigBee remote controller based on ZigBee 3.0
• Supports 1 group for binding max. 30 lighting devices
• Supports TouchLink to pair to a lighting device directly
• 2.4 GHz global operation
• Long battery life mesh technology
• Transmission range up to 30m
• Compatible with ZigBee Gateway products
• Enables to bind and control universal DIM, CCT, RGB, RGBW and RGB+CCT zigbee lighting devices
• With magnet on the back, easy to be absorbed on metal surface

ZigBee Clusters Supported by This Remote Are As Follows:

Input clusters:

• Basic   • Power Configuration   • Identify   • Diagnostics

Output clusters:

• Identify   • On/off   • Level control   • Ota   • Color control

Safety & Warnings

• This device contains a button lithium battery that shall be stored and disposed properly.
• DO NOT expose the device to moisture.

Operation

1.This ZigBee RGB+CCT remote is a wireless transmitter that communicates with a variety of ZigBee compatible systems. This transmitter sends wireless radio signals that are used to remotely control a compatible system.

2.This ZigBee remote supports 1 group for binding max. 30 lighting devices and enables to control both RGB and CCT ZigBee lighting devices.

3. Zigbee Network Pairing through Coordinator or Hub (Added to a Zigbee Network)

Step 1: Remove the remote from previous zigbee network if it has already been added to it, otherwise pairing will fail. Please refer to the part "Factory Reset Manually".

Step 3: Press and hold down until LED indicator turns on.

Step 2: From your zigbee controller or hub interface, choose to add device or accessory and enter Pairing mode as instructed by the controller.
Step 4: Immediately short press to search nearby network, indicator flashes every 1 second, 20 seconds timeout if there is no network. Indicator will then blink 5 times quickly for successful pairing.

Note: 1) After pairing successfully, the remote information will appear on the controller or hub interface.
　　　 2) No remote information will appear on the hub interface if pairing to Philips Hue Bridge.

4. TouchLink to a Zigbee Lighting Device

Step 1: Set the zigbee lighting device to start TouchLink commissioning, please refer to its manual to learn how.

Step 2: Bring the remote within 10cm of the lighting device.

< 10cm

ZigBee Lighting Device

Step 3: Press and hold down until LED indicator turns on.

Step 4: Immediately short press to start TouchLink commissioning of the remote. LED indicator flashes fast for 3S, then flash 6 times slowly to indicate successful pairing to the device and the light connected to the device will blink twice.
Note: 1) Directly TouchLink (both not added to a ZigBee network), each remote can link with 30 devices.
　　　 2) TouchLink after both added to a ZigBee network, each remote can link with max. 30 devices.
　　　 3) For Hue Bridge & Amazon Echo Plus, add remote and device to network first then TouchLink.
　　　 4) After TouchLink, the remote can control the linked lighting devices.
5. Removed from a Zigbee Network through Coordinator or Hub Interface

From your ZigBee controller or hub interface, choose to delete or reset the remote as instructed, indicator flashes 3 times quickly to indicate successful removing.
6. Factory Reset Manually

Note: All configuration parameters will be reset after the remote is reset or removed from the network.

Step 1: Press and hold down until LED indicator turns on.

Step 2: Immediately short press 5 times continuously, indicator flashes 3 times quickly to indicate successful reset.

7. Remove a Touchlink Paired ZigBee Lighting Device

Step 1: Set the Touchlink paired zigbee device to start TouchLink commissioning, please refer to its manual to learn how.

**Step 2**: Bring the remote within 10cm of the lighting device.

< 10cm

ZigBee Lighting Device

Step 3: Press and hold down until LED indicator turns on.

Step 4: Immediately short press twice to start TouchLink removing of the remote. LED indicator flashes fast for 3S, then flash 6 times slowly to indicate successful removing.

8. Factory Reset a Lighting Device (Touch Reset)

Note: the device shall be added to a network, the remote added to the same one or not added to any network.

Step 1: Set the zigbee device to start TouchLink commissioning, refer to its manual.

Step 2: Bring the remote within 10cm of the lighting device.
< 10cm

ZigBee Lighting Device

Step 3: Press and hold down until LED indicator turns on.

Step 4: Immediately short press 5 times to start Touch Reset of the remote. LED indicator flashes fast for 3S, then flash 3 times slowly to indicate successful reset.

9. Find and Bind a Zigbee Lighting Device

Note: Make sure the device and remote already added to the same zigbee network.

Step 1: Start find and bind mode on the Zigbee lighting device (initiator node) and enable it to find and bind target, refer to its manual.
ZigBee Lighting Device

Step 2: Press and hold down until LED indicator turns on.

Step 3: Short press to enable the remote (target node) to find and bind initiator.LED indicator flashes 4 times for successful binding or twice if binding fails.

Note: Each remote can bind max. 30 lighting devices.

10. Find and Unbind a Zigbee Lighting Device

Step 1: Start find and bind mode on the Zigbee lighting device (initiator node) and enable it to find and bind target, refer to its manual.
Step 2: Press and hold down until LED indicator turns on.

ZigBee Lighting Device

Step 3: Short press twice to enable the remote (target node) to find and unbind initiator. LED indicator flashes 4 times for successful unbinding or twice if unbinding fails.

11. Clear All Find and Bind Mode Paired Lighting Devices

**Step 1**: Press and hold down until LED indicator turns on.

Step 2: Short press 5 times continuously to clear all bound lighting devices . LED indicator flashes 4 times for successful unbinding.

12. Setup a Network & Add Devices to the Network (No Coordinator or Hub Required)

Step 1: Factory reset the remote and the lighting device, refer to their manuals.

Step 2: TouchLink the remote and device to setup a network, refer to their manuals.

< 10cm

ZigBee Lighting Device

Step 3: Short press button to enable the network to discover and add devices, LED indicator will flash twice. 180 seconds timeout, repeat the operation.

Step 4: Set another remote into network pairing mode and pair it to the network, refer to its manual.

Step 5: Add more remotes to the network as you would like.

Step 6: Factory reset the lighting devices that you would like to add to the network, refer to their manuals.

Step 7: Touchlink to pair the added remotes and lighting devices you would like to add, the devices will be added to the network through Touchlink, refer to their manuals.
13. OTA

The remote supports firmware updating through OTA, and will acquire new firmware from zigbee controller or hub every 10 minutes automatically.

14. How to Check Whether the Remote Belongs to a Network or not

Short press any button, indicator blinking means the remote has already been added to a network. No blinking of indicator means the remote does not belong to any network.

15. Battery Power Monitor Function

The remote will report battery power value to the coordinator under following situations:

• When powered on.

• When short pressing both brightness down button ☼ and ⟲ button simultaneously.

• When operating the switch to send data packets (over 4 hours since last operation).

• When added to the network by a coordinator.
