

Dee's Studio Portable  
Light  
Assembly

# Step 1: Unpack

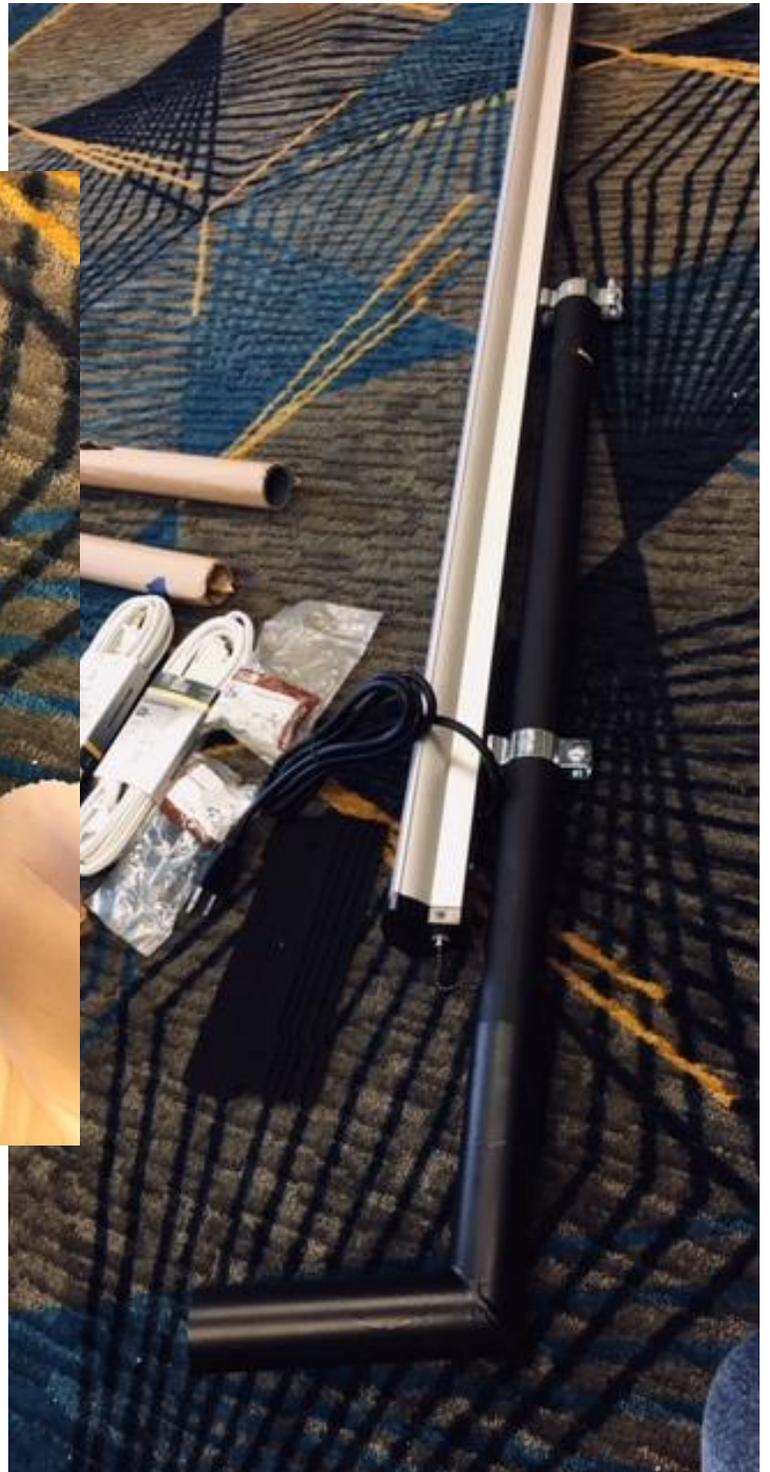

# Step 2: Assemble clamps (this is done already)

Step 3:  
Insert 36" pipe and snug up  
clamps

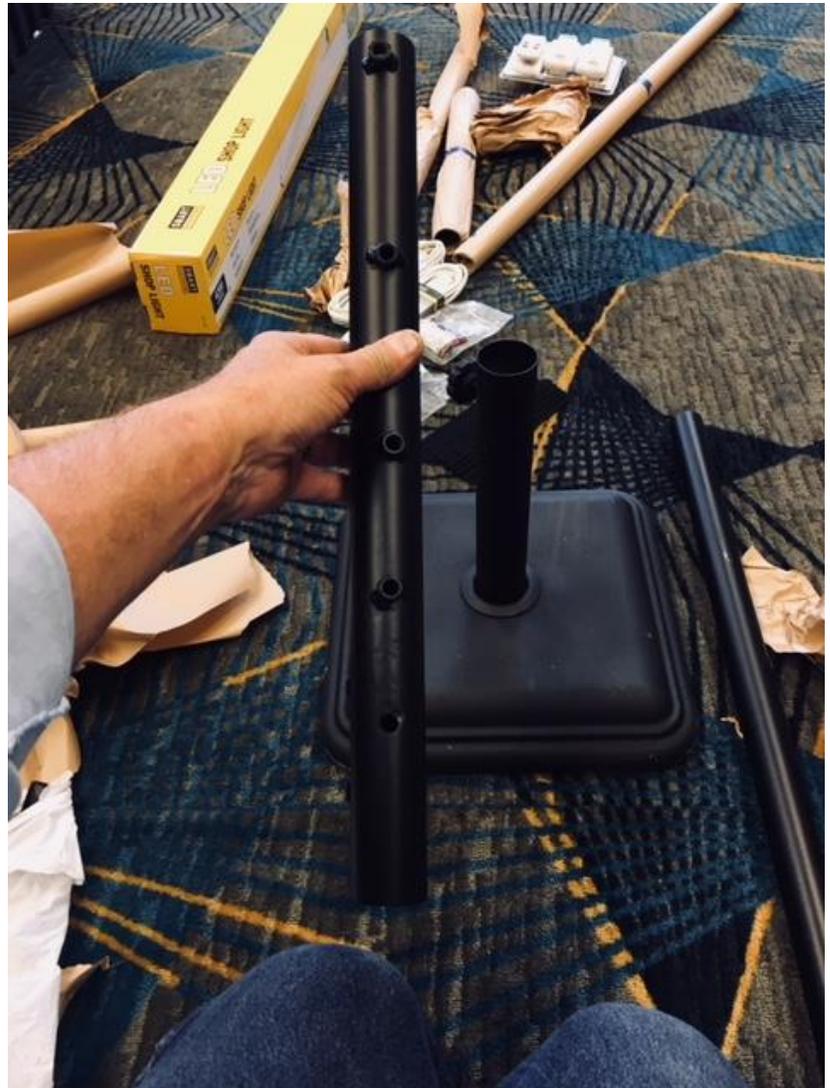

Step 4:  
Install elbow on end of 36" pipe

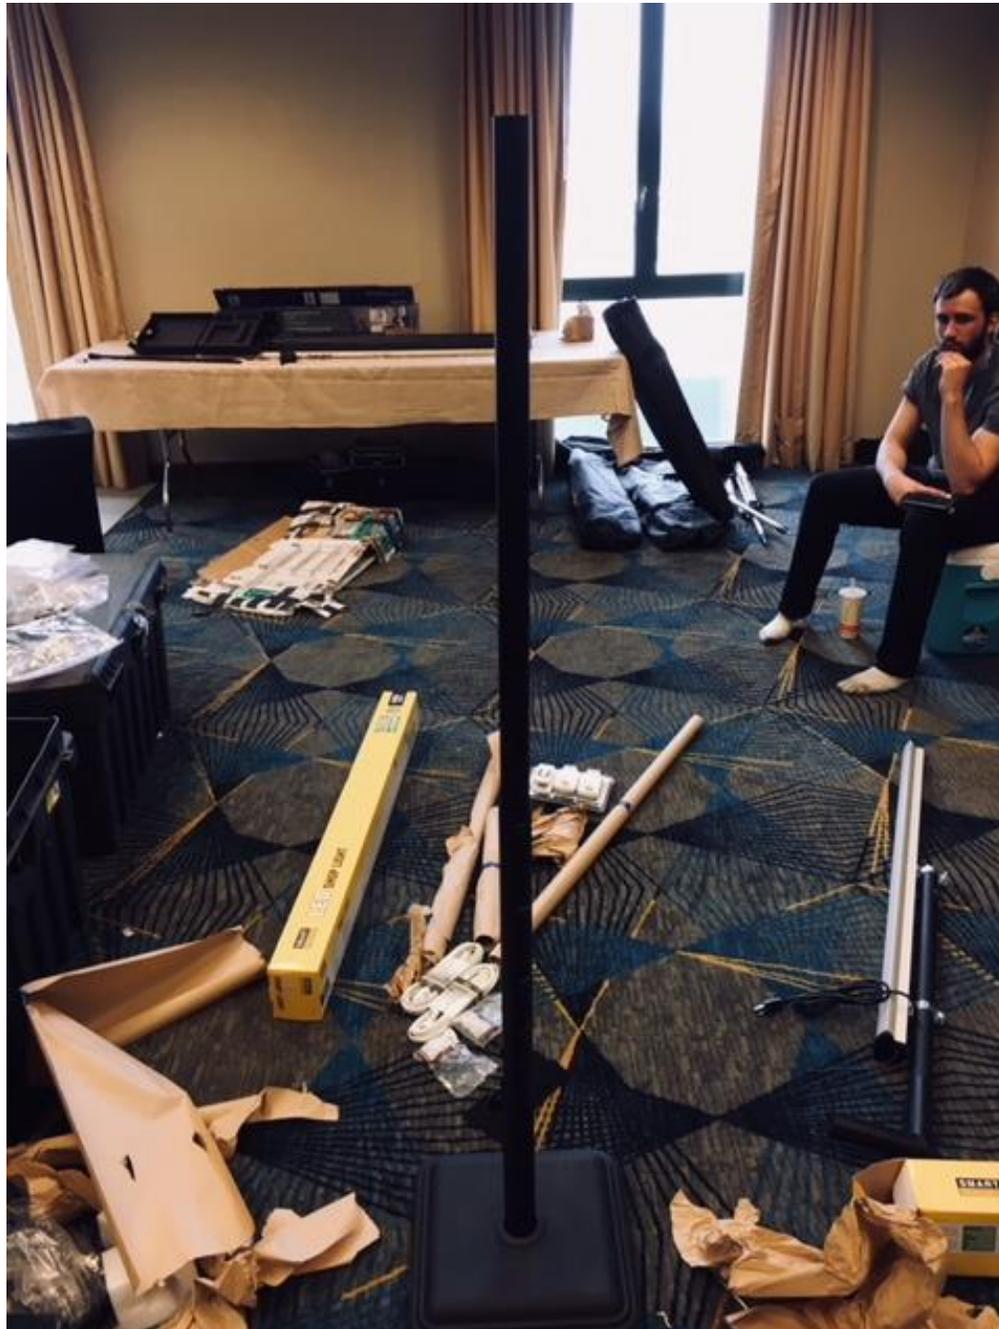

## Step 5:

There are two types of pipes you may get this one which has been replaced with a straight one that uses a hose clamp to set height simply insert it in your stand the long pipe will slide inside of this and you will use the hose clamp provided or if you have the other style use the bolts to adjust height.

# Step 6: If using a stand, place 4' pole in the extension in the stand

(Umbrella stand not included. They can be bought from any store that sells outdoor patio equipment)

Step 7:  
Place the light bar on tall pipe as  
shown

## Step 8:

Use wire ties to fasten cord to pipe once you have it adjusted to your height.

There are extension cords included to plug into any outlet or remote (optional) there is a pull chain that turns them on or off.

The lights can also be mounted directly to your longarm with the clamps included.
