

COMPLEXION 1

SKIN TYPE - Dry and Sensitive

SKIN CONCERNS - Rosacea, Preventative Aging, Aging Skin and/or Sporadic Breakouts

INDICATIONS OF COMPLEXION 1

- Redness or Rosacea
- Skin is easily irritated
- Combination of whiteheads and blackheads
- May have hyperpigmentation/Post breakout pigmentation spots
- Skin feels thirsty and dry
- Concerned with preventative aging or aging

These products are recommended because of their calming, soothing and hydrating properties. Serums and healing masks will help to rebuild and repair the epidermis. Rich moisturizers will help to rehydrate the skin and will also help to protect it from irritants such as extreme weather and pollution. It is a common misconception that sensitive or rosacea prone skin shouldn't be exfoliated, but that's a myth. A gentle exfoliation will help stimulate new cells, and strengthen the skin from within.

COMPLEXION 2

SKIN TYPE - Dry

SKIN CONCERNS - Dark spots, Preventative Aging and/or Aging Skin

INDICATIONS OF COMPLEXION 2

- Skin feel thirsty and dry
- Concerned about sun spots and uneven skin tone
- Fines lines and wrinkles
- Concerned with preventative aging or aging

These products are recommended to help reverse the signs of aging and even the skin tone. Regular exfoliation is key to increasing cell turnover and softening fine lines and dark spots. Vitamin rich serums will help to rebuild the skin by giving a nice plumping boost of hydration while helping to even skin tone. The use of peptides will help to give an appearance of firm and nourished skin leaving it smooth and supple with less visible wrinkles.

COMPLEXION 3

SKIN TYPE - Dry

SKIN CONCERNS - Dull, Preventative Aging, Aging Skin and/or Sporadic Breakouts

INDICATIONS OF COMPLEXION 3

- Skin feel thirsty and dry
- Concerned with preventative aging or aging
- Desires even skin tone
- May have breakouts consisting of whiteheads and blackheads
- Complexion looks dull
- Post breakout pigmentation spots

This regimen is recommended to boost cell turnover and circulation leaving the skin with a radiant glow. These serums and masks will help even skin tone and texture and make the skin feel soft, supple and plump. For sporadic breakouts, the Lychee Willow Bark Deep Clean and Watermelon Mint Hydrating Mist will help to clear breakouts and dark spots, while also hydrating the skin to avoid over drying. When the skin becomes stripped or dehydrated, more oil is produced causing excess breakouts. The use of a medium weight moisturizer will help to add hydration without causing excess oil to build up.

COMPLEXION 4

SKIN TYPE - Normal or Combination

SKIN CONCERNS - Preventative Aging, Aging Skin and/or Sporadic Breakouts

INDICATIONS OF COMPLEXION 4

- Concerned with preventative aging or aging
- Desires even skin tone
- May have breakouts consisting of whiteheads and blackheads
- May have oily t-zone
- Post breakout pigmentation spots

These products are recommended to increase cell turnover and even the complexion. The serums and masks will help fight signs of aging and prevent sporadic breakouts by delivering potent antioxidants and vitamins leaving skin radiant and healthy. A medium weight moisturizer will help to hydrate and nourish the skin without causing breakouts. A mattifying SPF will help to soak up oils produced throughout the day while fighting off any future sunspots.

COMPLEXION 5

SKIN TYPE - Normal or Combination

SKIN CONCERNS - Sensitive and/or Sporadic Breakouts

INDICATIONS OF COMPLEXION 5

- May have oily t-zone
- Face flushes easily
- Skin is easily irritated
- Post breakout pigmentation spots

These products are recommended because of their healing, and blemish clearing benefits. Both the cleanser and toner are important for balancing oil production and preventing future breakouts without leaving skin feeling tight, dry or irritated. They will also help to minimize the appearance of large pores. The serums and masks will help to calm and strengthen the skin from within while a gentle exfoliant will help to reveal a newly refined clarity and smoothness. Hydrating moisturizers and serums packed with antioxidants will help to fight the signs of aging without clogging the pores.

COMPLEXION 6

SKIN TYPE - Oily or Combination

SKIN CONCERNS - Preventative Aging, Aging Skin and/or Sporadic Breakouts

INDICATIONS OF COMPLEXION 6

- Concerned with preventative aging or aging
- Desires even skin tone
- May have breakouts consisting of whiteheads and blackheads
- May have large pores in t-zone
- Excess oil mainly in t-zone
- Post breakout pigmentation spots

This regimen is recommended to even the complexion and slow the signs of aging. Exfoliation will increase cell turnover giving a more even skin tone and a radiant glow. The serums and masks have been specifically chosen for this skin type to soften fine lines, prevent future breakouts and bring balance to the skin. Vitamins and antioxidants are just as beneficial when used externally on the skin as they are when taken internally and each regimen is packed with both. They will leave the skin healthy and renewed.

COMPLEXION 7

SKIN TYPE - Oily or Combination with Sensitivity

SKIN CONCERNS - Frequent Breakouts

INDICATIONS OF COMPLEXION 7

- May have large pores
- Skin feels oily but may have dry patches
- Face flushes easily
- Skin is easily irritated
- Combination of whiteheads, blackheads and cysts
- Post breakout pigmentation spots

This regimen is recommended to help heal existing blemishes and give a glowing complexion while minimizing irritation. While it's important to exfoliate problematic skin, it's important to be careful of over exfoliation. This can actually cause more dryness and irritation resulting in increased oil production and excess breakouts. We recommend a gentle exfoliant to avoid such problems. Adding antioxidants through a potent serum will help to build back up damaged skin. With this specific skin type it's also imperative to keep the skin hydrated. A lightweight, oil-free moisturizer will help to add hydration without causing extra blemishes.

COMPLEXION 8

SKIN TYPE - Oily or Combination

SKIN CONCERNS - Preventative Aging, Aging Skin and or/ Frequent Breakouts

INDICATIONS OF COMPLEXION 8

- Concerned with preventative aging or aging
- Desires even skin tone
- May have large pores
- May be oily in t-zone or all over
- Combination of whiteheads, blackheads and cysts
- Breakouts on 1/2 of the face
- Post breakout pigmentation spots

This regimen is recommended to help even skin tone, heal blemishes and fight the signs of aging. Regular exfoliation is key for this type of skin in order to eliminate dead skin cell buildup. It's equally as important to use serums and masks so the skin is not being over dried and irritated, which can lead to more breakouts. Cleansing, toning and light to medium weight moisturizer will give skin the perfect balance. A retinol serum and gentle exfoliant will help to even skin tone and fights signs of aging, leaving the skin revitalized and glowing.

COMPLEXION 9

SKIN TYPE - Oily or Combination

SKIN CONCERNS - Severe Breakouts

INDICATIONS OF COMPLEXION 9

- Large pores
- Overproduction of oil or skin feels oily all day
- May have large pores
- Combination of whiteheads, blackheads and cysts
- Breakouts on 2/3 of the face or more
- Post breakout pigmentation spots

This regimen is recommended to help heal existing breakouts, prevent future breakouts and help balance the skin. A gentle exfoliant will help to even the skin tone, without causing damage and over exfoliating the skin. Potent serums and masks will help to disinfect and calm the skin while also helping to control oil and clear clogged pores without causing irritation or over drying. An oil-free moisturizer will help to strengthen the skin and add hydration without clogging pores.
