

## #sewpowerfulcards

This cute note card uses up little shreds of fabric and thread to make a darling charm. Just press and sew. I like to add the water-soluble stabilizer to ensure I catch all the fabrics in the stitching. Some like to stitch without it. The fusible means the edges are finished with an edge stitch!

## Supplies

- Thin (1/8") strips of scrap fabrics
- Fusible interfacing
- Mesh Water-Soluble Stabilizer
- Iron
- Sewing Machine
- Industrial Hole Punch or Awl
- Waxed paper
- Cardstock
- Matching 1/8" wide ribbon or string

## Instructions

1. Gather a pile of fabric shreds (I like to use a cluster of compatible colors from my scrap pile)
2. Spread onto a 3" square of fusible interfacing
3. Cover with a sheet of waxed paper
4. Iron until all shreds are adhered to interfacing
5. Remove waxed paper
6. Cover with 3" square of water-soluble stabilizer
7. Stitch the sandwich across and down and around many times on your machine (I make "X"s and circles)
8. Run under warm water until all water-soluble stabilizer rinses away
9. Allow to dry
10. If desired, starch for added body and stiffness
11. You may want to stitch lace or decorative stitching around border but it is not necessary
12. Punch hole in top and hang on note card\* with a ribbon or colorful string
