46-48	117-122	2XL	L	2XL	L
50-52	127-132	2XL with Extender		2XL with Extender	

### 1. In between sizes?

HuggerPRIMA – Upsize to the nearest size.  
ie: 36 3/4 inches = size L

HuggerVIDA – Downsize to the nearest size.  
ie: 36 3/4 inches = size M

### 2. DD cup or higher?

For the HuggerPRIMA, we recommend that you upsize one size for comfort and wearability or add an EXTENDER.

With the 360° seamless knit mapped compression, you can still maintain good compression by upscaling and, most importantly, gain patient compliance with comfortability.

### 3. Use an EXTENDER for flexibility :)

Our patent-pending Extenders are made to easily zip into your Hugger to vary the compression & breathability instantly

- accommodate fluctuating cup/body size or additional compression pads/bandages
- allow for 24/7 post-surgical & lymphedema comfort
- allow you to easily adjust the size and fit of the Hugger.
