

Xsuper

Model: X96

Product: Auto Tracking Intelligent 3D Wheel Alignment

Description: The X96 aligner is perfect for usage on a 4post or scissor alignment lifts thanks to it's auto tracking system. A wheel alignment machine is used to adjust a vehicle's tracking. The system connects a vehicle to its wheels. It is not an adjustment of the tyres or wheels themselves. The key to proper alignment is adjusting the angles of the tyres which affects how they make contact with the road.

Equipment specification	
Operating temperature	-30°C - 50°C
Power consumption	300W
Wheel size	279.4 - 609.6mm
Tyre diameter	No limit
Power requirements	120v/230v 1PH 50/60Hz
Profile of wheel adapter	11 - 24"
Rolling compensation style	Forward-backward or backward-forward
Camera resolution	5M
Distance to wall	1600 - 3000mm
Suggested distance	2300mm
Short bay distance	1500mm
Distance between two cameras	2400mm
Minimum width of vehicle	1500mm
Maximum width of vehicle	2400mm
