

FORD F150 DYNAMIC COLORSHIFT DRL REPLACEMENTS + DYNAMIC TURN SIGNALS

PART #1330-332
MSRP: \$329.⁹⁵

The new ORACLE Lighting Dynamic ColorSHIFT DRLs are the latest advancement in our expansive lighting modifications. The Dynamic features allow the user to run multiple moving color patterns through the PCB, creating a vivid eye-catching lighting effect.

Conveniently controlled through a free smartphone App, the system features over 200 pre-programmed moving patterns as well as static color control and white mode for normal street driving.

In addition to the pre-programmed features the user can also create custom designs through pixel editing in the app.

The New Turn Signal adapter allows you to tap directly into your vehicle's wiring and will automatically switch to flashing amber for a 100% legal on-road driving light. Once the turn signal is disengaged, the DRL will switch back to the color of your choice.
