**4401 DIVISION ST
METAIRIE, LA 70002**

Since 1999 ORACLE Lighting has been developing custom lighting solutions using the latest in CCFL, Xenon, LED, SMD, and COB Lighting Technology. Our staff is not only trained on basic product knowledge, but also to understand the processes in which our products are built, the principals of how they operate, and the proper technique of installation.

Since we specialize in lighting (and only lighting) we are always happy to spend that extra bit of time explaining the principals of lighting and helping our customers understand what separates our products from some of the others out there.

For the past SIX years consecutively INC Magazine has listed ORACLE Lighting as one of the fastest growing privately held companies in the entire United States on the Inc.500-5000 List.

In 2012 ORACLE Lighting received a bronze American Business Award for "Consumer Products Company" of the year. In 2013 we were named "Small Business of the Year" by JEDCO, named "Exporter of the Year" by the U.S. Small Business Administration, and named a "Small Business Champion" by the U.S. Senate Committee for Small Business and Entrepreneurship awarded by the Committee Chair; Senator Mary Landrieu.

The resolute principals and solid foundation on which this company was founded has allowed organic growth at a rapid pace, yet we have always stressed that we can only be successful by delivering quality products at fair prices and respecting our customer base. We have recently elevated our own standards when, in 2012, we made a commitment to use only USA made LED chips in our Solid-State products. LEDs Made in the USA have higher lumen efficiency, are more dependable, and have a longer overall lifespan. We are committed to exceeding our customers' expectations & staying on the cutting edge of lighting technology.

Direct-Replacement DRL Circuit Boards from ORACLE Lighting allow you to easily change your factory Daytime Running Lights (DRL) to ORACLE ColorSHIFT® Lighting. These Circuit Boards are controlled by one of our remote systems to produce any color the user wishes. These circuit boards can make hundreds of different colors, dozens of patterns, control the brightness, and even the speed of the functions as well! Installation is relatively simple, unscrew the factory LED Circuit Boards and install the ORACLE ColorSHIFT® Circuit Boards in place.

@ORACLELIGHTS

Pre-Assembled headlights are great for customers that do not want to open their existing headlights to install a halo kit. These headlights come pre-assembled with ORACLE halos professionally installed. We offer these lights for almost every make and model and we are constantly adding new vehicles. Our Pre-Assembled Headlights have either Chrome or Black Headlight Housing depending on your choice. In addition to pre-assembled headlights we also offer matching halo fog-lights. Pair both of these items with an ORACLE wireless controller for a perfect lighting package.

ORACLE Pre-Installed Headlights are similar to stock Factory Lights, even meeting safety, durability and quality standards.

Package Contents: One Pair of Brand New OEM Factory style headlights with ORACLE Halo Rings Pre-installed.

These Pre-Assembled Headlights with the applicable safety and function requirements of U.S. Department of Transportation's Federal Motor Vehicle Safety Standard 108 (FMVSS) and SAE.

ORACLE Halo Rings are professionally installed in house by our own trained technicians.

we constantly update our pre-assembled headlight list. checkout www.oraclelights.com for the newest additions

CONCEPT SMD STRIP

Concept SMD Strips are semi-rigid high powered SMD strips used to add additional customized lighting to your headlights. Each strip contains over 140 SMDs. The SMDs on the strip are in a continuous pattern with no gaps, thus giving the appearance of a laser straight illumination. This uniform intensity gives any project that "high end" look.

TL 2.5" D2S BI-XENON RETROFIT PROJECTORS

The Acura TL Bi-Xenon Projectors are widely popular in HID retrofitting applications. These projectors are considered one of the best performing projector assemblies available on the market. The Acura TL projectors come with crystal clear ZKW-R lens. Instead of a "fuzzy" light dispersal, caused by low end lenses, these lenses create a distinct cut-off pattern (where the light output meets the top of the lens). Resulting in razor sharp and vibrant light.

50MM 2" H1 7.1 BI-XENON RETROFIT PROJECTORS

Small enough to fit in tight spaces for quad retrofits or fog light upgrades, these 50mm H1 Retrofit Projectors offer optically clear lenses and radically curved cutoff shields for maximized light output. Retracting bi-xenon mechanisms unleash a reliable and intense low/high beam. The threaded mounting shaft makes for ease of installation for many applications.

70MM 2.5" H1 6.1 BI-XENON RETROFIT PROJECTORS

Virtually the easiest projector to retrofit into any headlight housing, the 70mm H1 offers a low cost unit without sacrificing performance. This projector bolts right into the pre-existing hole in the back of your reflector bucket with little to no modification. The 70mm H1 offers amazing light output, the most precise sharp cutoff line, and non-existent glare.

SQUARE 2.75" D2S BI-XENON RETROFIT PROJECTORS

The D2S Square Projector is the successor to the normal D2S Projector, but offers a new designed lens. With its table-top light spread design, this projector is compatible with D2S and D2C bulbs, and produces a very sharp, attractive cut-off line (Vibrant band of colors across the top of light cut-off line). These projectors are very easy to install with a virtually no modification

ORACLE Projector Bezel Centric Rings are compatible with the following projectors:

- ORACLE Acura TL 2.5" Projectors
- ORACLE 70mm H1 6.1 Projectors

COLORSHIFT DEMON EYE KIT

Part# 8529-333

Take your projectors to the next level with the new ORACLE "Demon Eye" ColorSHIFT Projector Illumination Kit. This powerful ColorSHIFT LED device will allow you to illuminate or back-light your projector lenses, giving your vehicle the "Demon Eye" look. By using one of our ColorSHIFT controllers, you can change colors at your command. Installation is relatively simple.

SIDE FIRING FLEXIBLE LED STRIP

The light output on these strips display sideways instead of forwards. Meant to be placed in areas where you don't want the led strip to be visible, but want the light to peek through. Good for tight areas and small enclosures. The side-firing LED strip is used in applications where the light needs to shine parallel with the mounting surface rather than perpendicular with the mounting surface like normal LED strip.

Part# 3801

| | |
|--------------------|---------------------------------|
| LED Type: | Side Firing LEDs |
| Quantity: | Sold by the Foot or 200' Spools |
| Input: | Direct 12V Wiring |
| Wattage: | 1.5W per Foot |
| Backing: | 3M Adhesive |
| Waterproof Rating: | IP65 |
| Customization: | Can be cut to smaller lengths |
| Warranty: | Lifetime |

ORACLE LED strip maintains high-end double-layered P.C.B. circuit boards. Double Layer circuit boards have better heat dissipation and thermal properties which results in longer LED lifetime, durability, and overall reliability.

INTERIOR FLEXIBLE LED STRIP

Our "interior" flexible strip is most commonly used on projects where the lights will not come in contact with water or moisture. The absence of the waterproofing material allows the strips to fit into tighter spaces, become slightly more flexible, and are less expensive than the waterproof version.

EXTERIOR FLEXIBLE LED STRIP - WHITE BACKING

Our waterproof LED strips have an IP65 rating and are suitable for exterior or outdoor applications and areas subjected to high heat. For the waterproofing material we use a high grade silicone rather than epoxy. The reason is that epoxy is not as flexible and tends to yellow over time. For your convenience we offer 2 different color circuit boards- white and black. This helps conceal the LED strips in different types of applications.

3W UNIVERSAL CREE LED BOLT LIGHT

3 Watt LED Bolt Light is a High Intensity LED with a stud style screw design. It can be used on any type of vehicle or practical application. Used for interior/exterior applications including running light and flood lighting etc. The ORACLE 3-Watt CREE LED Bolt can also be used as a rock light. With a stud style screw design, the unit is resin injected making it 100% water tight and weatherproof. This makes it perfect for rugged applications such as under-cab rock lighting. This gives the driver increased visibility while crawling.

These genuine factory badges are modified to stand out from the crowd! We take the original emblems from the vehicle manufacturer and modify them to accept an acrylic plate fitted with ORACLE LEDs for a smooth visual pop. Simply remove the existing factory badge and install this in its place. Wiring is routed through existing holes in the trunk lid and ties into the parking lights and also includes pre-installed 3M adhesive backing. Add an ORACLE Dual-Intensity LED circuit and these illuminated badges can also be used as 3rd brake light.

We offer the option to professionally paint your emblem any factory GM color or flat/gloss black.

Looking for your next "head turning" mod guaranteed to grab attention at the local car meet? Then these are perfect for you! Designed to fit around the brake rotors of your vehicle, ORACLE Wheel Rings are aluminum strips formed in a circle, creating a ring. Mounted on the ring is high grade ORACLE LED Flex Strip. The flexible LED strip will illuminate your wheels and wheel barrels. At night these rings are intense. Each ring is built in-house, tested for durability and proper function, by our trained technicians.

LED ILLUMINATED WHEEL RINGS

Part# 4215

- Universal Vehicle Fitment
- LED Ring diameter: 15.5"
- Mounts to Brake Rotor Dust Shield
- Operating Voltage: 12V DC
- Vibrantly lights up Wheel Wells
- ORACLE Quality Flex LED Strip
- Fits around Brake Rotor
- Can withstand high temperatures
- Mounting Hardware included
- 1 Year Warranty

Each Illuminated Wheel Ring Kit includes a Rocker Switch for easy activation.

HAVE OVERSIZED ROTORS?

Rotors over 13.5" are considered oversized and will need to add the expanding adapter option. Be sure to check the diameter of your brake rotor to ensure proper fitment. For some vehicles with very large front rotors, expanding the front wheel rings is recommended.

Full functioning integrated amber LED's can be used as parking lights and turn signals. Inside components allow for full control over power mirror adjusters.

5TH GEN CAMARO CONCEPT SIDE MIRRORS

Part Series# Starting at 2980

The ORACLE Camaro Concept Side Mirror takes the design from the 2009 Camaro Concept Car. The design is sleeker for a more aerodynamic look. The integrated LED's inside the mirrors can be used as both turn signals and parking lights. An aspherical mirror is added for a wider field of view, so no visibility is compromised. These are plug & play design and hook right up to the factory harness to allow for full control over the mirror adjusters. The mirrors can be custom painted to match any factory GM color.

- Modeled after the Camaro Concept Car
- Aerodynamic Sleek Design
- Integrated LED Marker Lights
- Aspherical Mirror Glass
- Fits 2010-2014 Camaro Models
- Total 2 PCS- Driver & Passenger
- Connects to Factory Harness
- 2 Year Warranty

Aspherical mirrors allow for a wider field of view.

Dual Intensity allows the integrated LEDs to act as a supplement turn signal for your vehicle, when your turn indicators are activated.

We offer the option to professionally "Ghost Paint" your side mirrors. Ghost paint hides the integrated LEDs, but allows the light to still shine through the paint.

NEW PRODUCT

2015+ FORD MUSTANG HIGH OUTPUT LED REVERSE LIGHT

ORACLE Lighting's new reverse light is a complete housing replacement for the 2015 and up Ford Mustang. These solid-state LED emitters generate 450% more light than the factory halogen version. Installation is a simple "Plug and Play" process making it easy for a novice to install in under 15 minutes. Besides the improvement in styling, this unit offers a wider field of vision and greater rear visibility for driver safety. The LEDs are a bright 5000K color which works very well with the factory reverse light camera, making the field of view easier to see for the driver. The CREE XP-E LEDs draw a total of 27 watts and produce approximately 2,500 lumens of light output.

LED Lighting is a great way to update the look of your fog lights, daytime running lights, tail lights, and turn signals. You can give your lights the look of expensive HID's without the higher cost, longer installation and additional heat of an HID system. These are also great replacements due to the high-tech look of LED, which modernizes the vehicle instantly. Most applications take less than five minutes to install.

Improve Visibility, Night-time Safety, Light Output, Styling, and add Value to your Vehicle with ORACLE Lighting Premium HID Kits.

ORACLE Xenon Conversion kits were developed with strict standards and the latest technology available on the market. Each ORACLE HID Kit includes our slim fully DIGITAL CAN BUS ballasts.

Our Xenon Conversion Kits are so rugged that the Ballasts and Wiring can be completely submerged in water and continue to operate without failing.

The new "Plug and Play" wiring makes this installation as simple as changing your headlight bulbs and simply plugging in the Xenon Light Computers. ORACLE digital ballasts are equipped with new processors that have a startup of a much more efficient 6 amp compared to the industry standard 10 amp.

These changes are what makes ORACLE HID Kits an even higher quality and once again increased the standards of what makes a "Premium" kit different from the others out there.

HID KITS INCLUDE:

- (2) ORACLE Xenon HID Bulbs
- (2) Digital Xenon HID CANBUS Ballasts
- Optional "Plug and Play" Wiring Harness
- Written Instructions and Diagram
- Brackets, Extra Fuses, Connectors
- Metal Alloy Carrying Case

In today's vehicles, there are several Electronic Control Units used to control and monitor the many subsystems. Our CAN BUS Ballasts will communicate with your vehicle allowing the HID bulbs to operate properly.

ORACLE AC Ballasts convert the incoming 12V DC power into High Voltage AC Power that ignites and maintains a smooth and consistent stream of energy to the bulb. Our Alternating Current (AC) ballasts are more stable, have a faster start-up, and prolong the bulb's life.

35W CANBUS HID BALLAST

Part# 5906

The key component of all HID ballasts is the "controller" which controls all functions from the initial ignition to continually ensuring the xenon gas inside the bulb stays ignited. The quality of every ballast starts with the controller inside.

Our new 35W CANbus Ballast contains an ASIC chip controller.

The ASIC chip and integrated decoder circuit make this ballast compatible with any vehicle and can fix most of HID installing issues such as fault indicator lights, and bulbs flicking during operation. This special processor is made with powerful components of real-time lamp-monitoring & power compensation with full-time ballast protection circuitry.

Fits: 9003, 9004, 9005, 9006, 9007, 9008, H1, H3, H4, H7, H8, H9, H10, H11, H13

ASIC chip and integrated decoder circuit is visible on every ORACLE 35W CANbus ballast.

SLIM 24W BALLAST

Part# 5904

Mainly used for HID Fog Light Bulb applications
Fits: 9003, 9004, 9005, 9006, 9007, 9008, H1, H3, H4, H7, H8, H9, H10, H11, H13, P13, 5202

50W HID BALLAST

Part# 5802

Replacement ballast for 50W HID Bulbs
Fits: 9003, 9004, 9005, 9006, 9007, 9008, H1, H3, H4, H7, H8, H9, H10, H11, H13

D2S/D2R ADAPTER

Part# 2075

Plug & Play adapter to connect a D2S/D2R HID Bulb to our 35W CANbus Ballast.

XENON RECTIFIER

Part# 5903

Eliminates HID "Flicker" by stabilizing the input into the HID Ballast. Fits ALL Aftermarket HID Kits.

HID RELAY HARNESS

Part# 6108

470uf capacitor pre-installed and all connections are soldered and heat shrunk to insure long life and durability. All connectors are weather packed and are cut to length to insure a speedy installation.

The main complaint about HID's is that they blind other drivers. Well, if your lights are blinding people that means that the illumination is not on the road where it needs to be. The reason that many other aftermarket HID bulbs blind other drivers is because of inaccurate bulb geometry.

Factory headlights are designed so that the light hits the mirrored facets at certain angles to accurately project light onto the road. Other aftermarket HID bulbs commonly use a generic bulb that is re-based to fit different types of sockets and therefore does not project light accurately.

ORACLE bulbs are engineered to replicate the effects of the factory bulb and maintain accurate bulb geometry which puts light on the road instead of into oncoming traffic.

Whether you are replacing a bulb that is no longer working or just want to change the look of your factory HID lights, these bulbs are the answer. Dealerships may charge a high price for a single replacement HID bulb. ORACLE Factory HID bulb replacements are accurately manufactured to match OEM fitment. When changing your factory HID bulbs with ORACLE OE replacements, it is advisable to change both bulbs at the same time. Years of use of a factory HID bulb can cause the bulb to change color and not match the new ORACLE replacement bulb.

VECTOR SERIES GRILL - JEEP JK

54

PART NUMBER
5817

The ORACLE Lighting Vector™ Series Grill for the Jeep Wrangler JK is the first full-featured replacement grill with integrated LED light emitters for Low Beam, High Beam, DRL, and Turn Signal functionality. This unique design is equipped with an array of application-specific LED light emitters and has the aggressive styling that Jeep owners crave.

The Vector™ Series Grill features an impressive 5,600 Combined Lumen Low Beam with advanced optics for precision lighting that illuminates the road without blinding oncoming traffic. 7,200 Combined Lumens High Beam for illuminating any dark landscape. The simple wiring connection is "Plug and Play" thanks to the included harness adapter.

Additional benefits include an integrated LED Daytime Running Light (DRL) which increases driver safety by making the Wrangler more visible to other drivers on the road. This DRL also features a unique "startup sequence" display. Another safety feature is the vivid LED Turn Signal that is 4x brighter than the factory turn signal lamp.

Besides being functional, these LED Mirrors from ORACLE Lighting look great as well! The LED light bar is a custom design that features a total of 24 Cree XPE 1W LEDs. This gives the driver a total of 24W of LED power producing approximately 2200lm. Each unit has a 45° beam angle to optimize the driver's peripheral visibility, whether riding on the trail or in the desert. The housing material is made from rugged Poly-carbonate and bolts onto the vehicle using the factory mounts for easy installation. A set of anodized rock guards protects the LED acrylic lenses, which also houses the DBM Reflex LED optics. These efficient optics focus the light for optimal visibility from the driver seat position.

CURVED LED LIGHT BARS

60

ORACLE Lighting now offers the CREE powered 50", 52", and 54" Light Bars in a Curved Housing Option. These LED light bars transform the common rectangular light bar style into a curved style, matching the curved styling of most vehicles and offering a wider light dispersion without sacrificing forward firing distance. These light bars are perfect for off-roaders needing both forward and peripheral light dispersal, while eliminating the necessity of adding multiple light bars for this desired effect. These light bars contain both flood and spot optics for optimal light dispersal.

SLEEK LED LIGHT BARS

62

ORACLE Off-Road Sleek LED Light Bars boast a slim design and the latest optical lenses on the market, 4D optics. These new optics allow for precision spot illumination with the least amount of light fall-off. Utilizing a separately designed fish eye lens, instead of a reflector, the new optics system captures the maximum amount of light emitted from the LED and projects it exactly where you need it.

NEW PRODUCT

High Intensity Discharge (HID) lighting is excellent for Off-Road applications. HID lights have no filament and can sustain vibration and impact better than incandescent and halogen lights. HID is also very efficient and produces six times the amount of light per watt as its incandescent counterparts. Our HID Off-Road lights are available in Spotlight and Floodlight configurations, two different styles, and three different sizes. Regardless of your Off-Road lighting needs, ORACLE has you covered!

These new Slim-Design LED Floodlights are rugged enough for use Indoors or Outdoors. This is the perfect solution for energy efficient and economical Security Lighting, Warehouse Lighting, Up-Lighting, Landscape Lighting, or Task Lighting. Each size is available in Warm White (2700K-3000K) or Pure White (4000K-4300K)

bridgelux.

ORACLE Indoor / Outdoor, energy efficient LED Floodlights contain an internal LED Driver and delivers an immense amount of light for such a small fixture. These floodlights are highly versatile with minimized power consumption and heat output compared to halogen or sodium lights. These floodlights can be upgraded with a motion sensor or garden stake for foliage lighting. Aluminum housing is designed to be weatherproof and fire resistant.

Designed for use indoors and outdoors these highly efficient floodlights are an excellent replacement for security lighting, halogen floodlights, sodium floodlights, or for landscape lighting. LED lamps do not output excessive heat, while halogen can become extremely hot allowing for possible injury. *Rated for wet conditions and are shockproof.*

Photometric (.IES) files can be provided upon request.

Ground stakes and motion sensors are also available.

LED Shop lights have many advantages over traditional halogen work lights. The LED versions are 10x as efficient as halogen, this means a 30W LED light would be equivalent to a 300W Halogen, that is some serious energy savings! LED shop lights also put out no heat which makes for a much more comfortable working environment.

ADHESION PROMOTER APPLICATOR PADS

- Part# 2001**
- Increases bonding effectiveness of adhesives
 - Convenient packet applicator is easy to use.
 - Dries in approximately 30 seconds.
 - One packet covers approximately 1 Sq/Ft.

DIELECTRIC GREASE

- Part# 2080**
- Seals out Moisture
 - Prevents Corrosion
 - Protect connections
 - Net Wt. 7.5gr

Application: Apply generous amount onto contacts on any connection that is exposed to moisture or weather changes.

SINGLE COLOR HALO INSTALLATION KIT

- Part# 2001**
- 25ft 22AWG 2 Conductor Wire
 - (1) In-Line Waterproof Fuse Holder
 - (1) 7.5A Medium Blade Fuse
 - (10) Waterproof Junction Connectors
 - (2) Female Spade Terminals
 - (1) LED Rocker Toggle Switch

20AWG 2-CONDUCTOR INSTALLATION WIRE

- Part# 2005**
- High Performing Cable
 - Oxygen-Free Copper (OFC)
 - Ideal for Single Color LEDs
 - Sold by the FT or by the Spool
 - 20AWG

This 20AWG 2-Conductor wire is the same cable used in the manufacturing of ORACLE SMD Halo Rings.

22AWG 4-CONDUCTOR INSTALLATION WIRE

- Part# 2006**
- High Performing Cable
 - Oxygen-Free Copper (OFC)
 - Ideal for ColorSHIFT LEDs
 - Sold by the FT or by the Spool
 - 4 Conductor
 - 22 AWG

This 22AWG 4-Conductor wire is the same cable used in the manufacturing of ORACLE ColorSHIFT Halo Rings.

ORACLE Lighting provides Premium LED Drivers and Power Supplies in many different amperages and wattages. From indoor to exterior water-proof drivers, each driver meets or exceeds federal regulations for power supply adapters.
