Since 1999 ORACLE Lighting has been developing custom lighting solutions using the latest in CCFL, Xenon, LED, SMD, and COB Lighting Technology. Our staff is not only trained on basic product knowledge, but also to understand the processes in which our products are built, the principals of how they operate, and the proper technique of installation.

Since we specialize in lighting (and only lighting) we are always happy to spend that extra bit of time explaining the principals of lighting and helping our customers understand what separates our products from some of the others out there.

For the past SIX years consecutively INC Magazine has listed ORACLE Lighting as one of the fastest growing privately held companies in the entire United States on the Inc.500-5000 List.

In 2012 ORACLE Lighting received a bronze American Business Award for “Consumer Products Company” of the year. In 2013 we were named “Small Business of the Year” by JEDCO, named “Exporter of the Year” by the U.S. Small Business Administration, and named a “Small Business Champion” by the U.S. Senate Committee for Small Business and Entrepreneurship awarded by the Committee Chair; Senator Mary Landrieu.

The resolute principals and sold foundation on which this company was founded has allowed organic growth at a rapid pace, yet we have always stressed that we can only be successful by delivering quality products at fair prices and respecting our customer base. We have recently elevated our own standards when, in 2012, we made a commitment to use only USA made LED chips in our Solid-State products. LEDs Made in the USA have higher lumen efficiency, are more dependable, and have a longer overall lifespan. We are committed to exceeding our customers’ expectations & staying on the cutting edge of lighting technology.

Direct- Replacement DRL Circuit Boards from ORACLE Lighting allow you to easily change your factory Daytime Running Lights (DRL) to ORACLE ColorSHIFT® Lighting. These Circuit Boards are controlled by one of our remote systems to produce any color the user wishes. These circuit boards can make hundreds of different colors, dozens of patterns, control the brightness, and even the speed of the functions as well! Installation is relatively simple, unscrew the factory LED Circuit Boards and install the ORACLE ColorSHIFT® Circuit Boards in place.

WWW.ORACLELIGHTS.COM
The new ORACLE Lighting Dynamic ColorSHIFT Halo Kit is the latest advancement in our expansive lighting modifications. The new Dynamic feature allows the user to run multiple moving color patterns through the Halo ring creating a vivid eye-catching lighting effect. Conveniently controlled through a free smartphone App, the system features over 200 pre-programmed moving patterns as well as static color control and white mode for normal street driving. In addition to the pre-programmed features the user can also create custom designs through pixel editing in the app.
ORACLE Wireless LED Controllers allow you to take your LED lighting to the next level with a variety of functions and features. We offer a wide range of different types of controllers to fit just about any project or application. These controllers also make installation easier by simplifying the wiring process and creating a common junction.

@ORACLELIGHTS
Pre-Assembled headlights are great for customers that do not want to open their existing headlights to install a halo kit. These headlights come pre-assembled with ORACLE halos professionally installed. We offer these lights for almost every make and model and we are constantly adding new vehicles. Our Pre-Assembled Headlights have either Chrome or Black Headlight Housing depending on your choice. In addition to pre-assembled headlights we also offer matching halo fog-lights. Pair both of these items with an ORACLE wireless controller for a perfect lighting package.

ORACLE Pre-Installed Headlights come factory style headlights with ORACLE Halo Rings pre-installed. These Pre-Assembled Headlights meet the applicable safety and function requirements of U.S. Department of Transportation's Federal Motor Vehicle Safety Standard 108 (FMVSS) and SAE.

Package Contents: One Pair of Brand New OEM Factory Style Headlights with ORACLE Halo Rings Pre-installed.

CONCEPT SMD STRIPS

**CONCEPT SMD STRIP**

Concept SMD Strips are semi-rigid high powered SMD strips used to add additional customized lighting to your headlights. Each strip contains over 140 SMDs. The SMDs on the strip are in a continuous pattern with no gaps, thus giving the appearance of a laser straight illumination. This uniform intensity gives any project that “high end” look.

- **Input:** 12V Universal Application
- **Construction:** Semi-Rigid High Powered SMD Strip
- **LED Count per 16" Strip:** Each 16" Strip Contains over 140 LEDs
- **Quantity:** Sold In Pairs
- **Sizes:** 16", 12", 8" or 4" Length
- **Color:** White, Blue, Red, or Amber
- **Customization:** Can be cut down to smaller sizes

**RGB 5050 CONCEPT SMD STRIP**

You can now have limitless color effects added to a stylized DRL or custom headlight application. These premium, super bright 5050 SMDs are attached to a rigid but flexible straight PCB board allowing for bending and curving without the risk of fragmenting.

- **Input:** 12V Universal Application
- **Construction:** Thicker PCB board makes the strips easier to bend and mold into shapes.
- **LEDs:** Bridgelux 5050 RGB SMD chips (Made in the U.S.A.)
- **Quantity:** Sold in Pairs
- **Sizes:** 16", 8" or 4" Length
- **Color:** Can produce thousands of color hues with the use of a ColorSHIFT RGB Controller
- **Customization:** Can be cut down to smaller sizes

**RETROFIT PROJECTORS**

**TL 2.5" D2S BI-XENON RETROFIT PROJECTORS**

The Acura TL Bi-Xenon Projectors are widely popular in HID retrofitting applications. These projectors are considered one of the best performing projector assemblies available on the market. The Acura TL projectors come with crystal clear ZKW-H lens. Instead of a “fuzzy” light dispersal, caused by low end lenses, these lenses create a distinct cut-off pattern where the light output meets the top of the lens. Resulting in razor sharp and vibrant light.

**Part# 8505**

- **Depth:** 6.25"
- **Height:** 4.40"
- **Width:** 4.25"
- **Lens Diameter:** 2.5"
- **Projector Shutter:** High & Low Beam Compatible
- **Accessories Included:** Bulb Adapter & Holder
- **Warranty:** 3 Years
- **Ideal Fitment:** For Vehicles that use D2S HID Bulbs

**50MM 2" H1 7.1 BI-XENON RETROFIT PROJECTORS**

Small enough to fit in tight spaces for quad retrofits or fog light upgrades, these 50mm H1 Retrofit Projectors offer optically clear lenses and radically curved cutoff shields for maximized light output. Retracting bi-xenon mechanisms unleash a reliable and intense low/high beam. The threaded mounting shaft makes for ease of installation for many applications.

**Part# 8530**

- **Depth:** 4.33"
- **Height:** 2.36"
- **Width:** 2.76"
- **Lens Diameter:** 2"
- **Mounting Shaft:** 0.78"
- **Required Housing Depth:** 2.10"
- **Projector Shutter:** High & Low Beam Compatible
- **Cutoff Shields:** Newly Designed Precise Cutoff
- **Accessories Included:** Bulb Adapter, Locking Plates, Gatling Bezels
- **Warranty:** 3 Years

**70MM 2.5" H1 6.1 BI-XENON RETROFIT PROJECTORS**

Virtually the easiest projector to retrofit into any headlight housing, the 70mm H1 offers a low cost unit without sacrificing performance. This projector bolts right into the pre-existing hole in the back of your reflector bucket with little to no modification. The 70mm H1 offers amazing light output, the most precise sharp cutoff line, and nonexistent glare.

**Part# 8517**

- **Depth:** 5.35"
- **Height:** 3.42"
- **Width:** 2.75"
- **Lens Diameter:** 2.5"
- **Mounting Shaft:** 0.78"
- **Required Housing Depth:** 4.11"
- **Projector Shutter:** High & Low Beam Compatible
- **Cutoff Shields:** Newly Designed Precise Cutoff
- **Accessories Included:** Bulb Adapter, Locking Plates, Gatling Bezels
- **Warranty:** 3 Years

**SQUARE 2.75" D2S BI-XENON RETROFIT PROJECTORS**

The D2S Square Projector is the successor to the normal D2S Projector, but offers a new designed lens. With its table top light spread design, this projector is compatible with D2S and D2C bulbs, and produces a very sharp, attractive cut-off line (Vibrant band of colors across the top of light cut-off line). These projectors are very easy to install with a virtually no modification.

**Part# 8518**

- **Depth:** 5.7"
- **Height:** 3.7"
- **Width:** 3.9"
- **Lens Diameter:** 2.75"
- **Mounting Shaft:** 1.3"
- **Projector Shutter:** High & Low Beam Compatible
- **Accessories Included:** Bulb Adapter & Locking Plates
- **Warranty:** 3 Years
- **Ideal Fitment:** For Vehicles that use D2S or D2C HID Bulbs

We also offer specialized square plasma halo for direct fitment onto your Square D2S Projectors.

**COLORSHIFT DEMON EYE KIT**

Part# 8529-333

Take your projectors to the next level with the new ORACLE "Demon Eye" ColorSHIFT Projector Illumination Kit. This powerful ColorSHIFT LED device will allow you to illuminate or back-light your projector lenses, giving your vehicle the "Demon Eye" look. By using one of our ColorSHIFT controllers, you can change colors at your command. Installation is relatively simple.

**BEzel CENTRIC RINGS**

Part# 8528

Snaps directly into the inside of a 3" projector bezel allowing for 3" bezels to fit onto a 2.5" projector. This opens up a wider selection of bezels for 2.5" projectors to choose from, making your retrofit more diverse.

ORACLE Projector Bezel Centric Rings are compatible with the following projectors:

- ORACLE Acura TL 2.5" Projectors
- ORACLE 70mm H1 6.1 Projectors

SIDE FIRING FLEXIBLE LED STRIP

The light output on these strips display sideways instead of forwards. Meant to be placed in areas where you don’t want the led strip to be visible, but want the light to peek through. Great for tight areas and small enclosures. The side-firing LED strip is used in applications where the light needs to shine parallel with the mounting surface rather than perpendicular with the mounting surface like normal LED strip.

ORACLE LED strip maintains high-end double-layered P.C.B. circuit boards. Double Layer circuit boards have better heat dissipation and thermal properties which results in longer LED lifetime, durability, and overall reliability.

INTERIOR FLEXIBLE LED STRIP

Our "interior" flexible strip is most commonly used on projects where the lights will not come in contact with water or moisture. The absence of the waterproofing material allows the strips to fit into tighter spaces, become slightly more flexible, and are less expensive than the waterproof version.

ORACLE LED strip exclusively uses Bridgelux LEDs which have an excellent lumen-to-watt efficiency rating, have a very long lifetime, and are made in the USA.
### EXTERIOR FLEXIBLE LED STRIP - WHITE BACKING

Our waterproof LED strips have an IP65 rating and are suitable for exterior or outdoor applications and areas subjected to high heat. For the waterproofing material we use a high grade silicone rather than epoxy. The reason is that epoxy is not as flexible and tends to yellow over time. For your convenience we offer 2 different color circuit boards: white and black. This helps conceal the LED strips in different types of applications.

Our strips also feature authentic 3M adhesive backing for ease of installation in many locations such as in the engine bay, under the vehicle, interior footwells, and many other places.

Perfect for emergency vehicles and first responders, our strobe lights come in a variety of sizes all using the latest in LED technology. The “undercover” style strobe lights come in 3 LED, 4 LED, and 6 LED sizes and have a flush-mount installation. Each type of strobe light we offer has an internal processor with 19 different strobing patterns.
These genuine factory badges are modified to stand out from the crowd! We take the original emblems from the vehicle manufacturer and modify them to accept an acrylic plate fitted with ORACLE LEDs for a smooth visual pop. Simply remove the existing factory badge and install this in its place. Wiring is routed through existing holes in the trunk lid and ties into the parking lights and also includes pre-installed 3M adhesive backing. Add an ORACLE Dual-Intensity LED circuit and these illuminated badges can also be used as 3rd brake light.

We offer the option to professionally paint your emblem any factory GM color or flat/gloss black.

Looking for your next "head turning" mod guaranteed to grab attention at the local car meet? Then these are perfect for you! Designed to fit around the brake rotors of your vehicle, ORACLE Wheel Rings are aluminum strips formed in a circle, creating a ring. Mounted on the ring is high grade ORACLE LED Flex Strip. The flexible LED strip will illuminate your wheels and wheel barrels. At night these rings are intense. Each ring is built in-house, tested for durability and proper function, by our trained technicians.

LED ILLUMINATED WHEEL RINGS

Part# 4215
• Universal Vehicle Fitment
• LED Ring diameter: 15.5"
• Mounts to Brake Rotor Dust Shield
• Operating Voltage: 12V DC
• Vibrantly lights up Wheel Wells
• ORACLE Quality Flex LED Strip
• Fits around Brake Rotor
• Can withstand high temperatures
• Mounting Hardware included
• 1 Year Warranty

HAVE OVERSIZED ROTORS?
Rotors over 13.5" are considered oversized and will need to add the expanding adapter option. Be sure to check the diameter of your brake rotor to ensure proper fitment. For some vehicles with very large front rotors, expanding the front wheel rings is recommended.

5TH GEN CAMARO CONCEPT SIDE MIRRORS

Part Series# Starting at 2980
The ORACLE Camaro Concept Side Mirror takes the design from the 2009 Camaro Concept Car. The design is sleeker for a more aerodynamic look. The integrated LEDs inside the mirrors can be used as both turn signals and parking lights. An aspherical mirror is added for a wider field of view, so no visibility is compromised. These are plug & play design and hook right up to the factory harness to allow for full control over power mirror adjusters. The mirrors can be custom painted to match any factory GM color.

- Modeled after the Camaro Concept Car
- Aerodynamic Sleek Design
- Integrated LED Marker Lights
- Aspherical Mirror Glass
- Fits 2010-2014 Camaro Models
- Total 2 PCS: Driver & Passenger
- Connects to Factory Harness
- 2 Year Warranty

Dual Intensity allows the integrated LEDs to act as a supplement turn signal for your vehicle, when your turn indicators are activated.

Full functioning integrated amber LEDs can be used as parking lights and turn signals. Inside components allow for full control over power mirror adjusters.

CORVETTE C6 CONCEPT SIDE MIRRORS

Part Series# Starting at 3901
The design is sleeker for a more aerodynamic look. The integrated LEDs inside the mirrors can be used as both turn signals and parking lights. An aspherical mirror is added for a wider field of view, so no visibility is compromised. These are plug & play design and hook right up to the factory harness to allow for full control over the mirror adjusters. The mirrors can be custom painted to match any factory GM color.

- Aerodynamic Sleek Design
- Integrated LED Marker Lights

LED Lighting is a great way to update the look of your fog lights, daytime running lights, tail lights, and turn signals. You can give your lights the look of expensive HIDs without the higher cost, longer installation and additional heat of an HID system. These are also great replacements due to the high-tech look of LED, which modernizes the vehicle instantly. Most applications take less than five minutes to install.
Improve Visibility, Night-time Safety, Light Output, Styling, and add Value to your Vehicle with ORACLE Lighting Premium HID Kits.

ORACLE Xenon Conversion kits were developed with strict standards and the latest technology available on the market. Each ORACLE HID Kit includes our slim fully DIGITAL CAN BUS ballasts.

Our Xenon Conversion Kits are so rugged that the Ballasts and Wiring can be completely submerged in water and continue to operate without failing.

The new “Plug and Play” wiring makes this installation as simple as changing your headlight bulbs and simply plugging in the Xenon Light Computers. ORACLE digital ballasts are equipped with new processors that have a startup of a much more efficient 6 amp compared to the industry standard 10 amp.

These changes are what makes ORACLE HID Kits an even higher quality and once again increased the standards of what makes a “Premium” kit different from the others out there.

HID KITS INCLUDE:

- (2) ORACLE Xenon HID Bulbs
- (2) Digital Xenon HID CANBUS Ballasts
- Optional “Plug and Play” Wiring Harness
- Written Instructions and Diagram
- Brackets, Extra Fuses, Connectors
- Metal Alloy Carrying Case

In today’s vehicles, there are several Electronic Control Units used to control and monitor the many subsystems. Our CAN BUS Ballasts will communicate with your vehicle allowing the HID bulbs to operate properly.

ORACLE AC Ballasts convert the incoming 12V DC power into High Voltage AC Power that ignites and maintains a smooth and consistent stream of energy to the bulb. Our Alternating Current (AC) ballasts are more stable, have a faster start-up, and prolong the bulb’s life.

**35W CANBUS HID BALLAST**

Part# 5906

The key component of all HID ballasts is the "controller" which controls all functions from the initial ignition to continually ensuring the xenon gas inside the bulb stays ignited. The quality of every ballast starts with the controller inside.

Our new 35W CANbus Ballast contains an ASIC chip controller.

The ASIC chip and integrated decoder circuit make this ballast compatible with any vehicle and can fix most of HID installing issues such as fault indicator lights, and bulbs flickering during operation. This special processor is made with powerful components of real-time lamp-monitoring & power compensation with full-time ballast protection circuitry.

Fits: 9003, 9004, 9005, 9006, 9007, 9008, H1, H3, H4, H7, H8, H9, H10, H11, H13

**SLIM 24W BALLAST**

Part# 5804

Mainly used for HID Fog Light Bulb applications

Fits: 9003, 9004, 9005, 9006, 9007, 9008, H1, H3, H4, H7, H8, H9, H10, H11, H13, P13, 5202

**50W HID BALLAST**

Part# 5802

Replacement ballast for 50W HID Bulbs

Fits: 9003, 9004, 9005, 9006, 9007, 9008, H1, H3, H4, H7, H8, H9, H10, H11, H13

**D2S/D2R ADAPTER**

Part# 2075

Plug & Play adapter to connect a D2S/D2R HID Bulb to our 35W CANbus Ballast.

**XENON RECTIFIER**

Part# 5903

Eliminates HID "Flicker" by stabilizing the input into the HID Ballast. Fits ALL Aftermarket HID Kits.

**HID RELAY HARNESS**

Part# 6108

470uf capacitor pre-installed and all connections are soldered and heat shrunk to insure long life and durability. All connectors are weather packed and are cut to length to insure a speedy installation.
The main complaint about HID's is that they blind other drivers. Well, if your lights are blinding people that means that the illumination is not on the road where it needs to be. The reason that many other aftermarket HID bulbs blind other drivers is because of inaccurate bulb geometry.

Factory headlights are designed so that the light hits the mirrored facets at certain angles to accurately project light onto the road. Other aftermarket HID bulbs commonly use a generic bulb that is re-based to fit different types of sockets and therefore does not project light accurately.

ORACLE bulbs are engineered to replicate the effects of the factory bulb and maintain accurate bulb geometry which puts light on the road instead of into oncoming traffic.

Whether you are replacing a bulb that is no longer working or just want to change the look of your factory HID lights, these bulbs are the answer. Dealerships may charge a high price for a single replacement HID bulb. ORACLE Factory HID bulb replacements are accurately manufactured to match OEM fitment. When changing your factory HID bulbs with ORACLE OE replacements, it is advisable to change both bulbs at the same time. Years of use of a factory HID bulb can cause the bulb to change color and not match the new ORACLE replacement bulb.

Besides being functional, these LED Mirrors from ORACLE Lighting look great as well! The LED light bar is a custom design that features a total of 24 Cree XPE 1W LEDs. This gives the driver a total of 24W of LED power producing approximately 2200lm. Each unit has a 45° beam angle to optimize the driver’s peripheral visibility, whether riding on the trail or in the desert. The housing material is made from rugged Poly-carbonate and bolts onto the vehicle using the factory mounts for easy installation. A set of anodized rock guards protects the LED acrylic lenses, which also houses the DBM Reflex LED optics. These efficient optics focus the light for optimal visibility from the driver seat position.

Light Bar Compatibility: 50" Straight LED Light Bar

WWW.ORACLELIGHTS.COM
ORACLE Lighting now offers the CREE powered 50", 52", and 54" Light Bars in a Curved Housing Option. These LED light bars transform the common rectangular light bar style into a curved style, matching the curved styling of most vehicles and offering a wider light dispersion without sacrificing forward firing distance. These light bars are perfect for off-roads needing both forward and peripheral light dispersal, while eliminating the necessity of adding multiple light bars for this desired effect. These light bars contain both flood and spot optics for optimal light dispersal.

Our Curved LED Light Bar Brackets will allow you to mount a 52" Curved LED Light Bar to the roof of your vehicle. These brackets are designed to match the curvature of the ORACLE 52" 300W LED Light Bar and are made from Powder-Coated plate steel. These brackets mount inside of the door jamb or drip sill depending on your application, but fully protect your vehicle from the outside elements by using the included all-weather gaskets. All stainless steel mounting hardware, weather gaskets and DIY Installation instructions are included. These brackets will also fit a 54" Light Bar #5764 as well as the 50" Curved Light Bar #5750 (with spacers).

ORACLE Off-Road Sleek LED Light Bars boast a slim design and the latest optical lenses on the market, 4D optics. These new optics allow for precision spot illumination with the least amount of light fall-off. Utilizing a separately designed fish eye lens, instead of a reflector, the new optics system captures the maximum amount of light emitted from the LED and projects it exactly where you need it.

High intensity Discharge (HID) lighting is excellent for Off-Road applications. HID lights have no filament and can sustain vibration and impact better than incandescent and halogen lights. HID is also very efficient and produces six times the amount of light per watt as its incandescent counterparts. Our HID Off-Road lights are available in Spotlight and Floodlight configurations, two different styles, and three different sizes. Regardless of your Off-Road lighting needs, ORACLE has you covered!

- **Relay:** 40 AMP with Connectors
- **In-line Fuse:** 30 AMP
- **Max Wattage Output:** 50W @ 2
- **On/Off Switch:** Pre-wired
- **Connections:** Soldered & Heat Shrink
- **Advantage:** Simplifies Off-Road Light Installation

### Wireless Double Light Harness

**Part#: 5772**
- **Relay:** 40 AMP with Connectors
- **In-line Fuse:** 30 AMP
- **Max Wattage Output:** 80W
- **On/Off Switch:** Pre-wired
- **Connections:** Soldered & Heat Shrink
- **Advantage:** Simplifies Off-Road Light Installation

### 2” Aluminum Bar Clamp Mount

**Part#: 5771**
- **Construction:** Billet Aluminum Construction
- **Finish:** Textured Black Powdercoat Finish
- **Mount Fitment:** Fits 1.5”-2” Tube
- **Hardware:** Includes Rubber Insulators
- **Accessories Included:** 504 Stainless Steel Hardware
- **Advantage:** No Modification to Vehicle Required

### 1” Aluminum Bar Clamp Mount

**Part#: 5773**
- **Construction:** Billet Aluminum Construction
- **Finish:** Textured Black Powdercoat Finish
- **Mount Fitment:** Fits 1”-1.5” Tube
- **Hardware:** Includes Rubber Insulators
- **Accessories Included:** 304 Stainless Steel Hardware
- **Advantage:** No Modification to Vehicle Required

### Off-Road Magnet Mount

**Part#: 2015**
- **Magnet:** Industrial Strength
- **Fitment:** Can be used with any Off-Road Lights
- **Advantage:** No Modification to Vehicle Required

### Waterproof Squared™ Halos

The new ORACLE Waterproof 3” Squared Halos can be installed onto any 3” Square Off-Road Lights. Revolutionary Waterproof design can operate in the worst possible conditions. These new Slim-Design LED Floodlights are rugged enough for use Indoors or Outdoors. This is the perfect solution for energy efficient and economical Security Lighting, Warehouse Lighting, Up-Lighting, Landscape Lighting, or Task Lighting. Each size is available in Warm White (2700K-3000K) or Pure White (4000K-4300K).

ORACLE Indoor / Outdoor, energy efficient LED Floodlights contain an internal LED Driver and delivers an immense amount of light for such a small fixture. These floodlights are highly versatile with minimized power consumption and heat output compared to halogen or sodium lights. These floodlights can be upgraded with a motion sensor or garden stake for foliage lighting. Aluminum housing is designed to be weatherproof and fire resistant.

Designed for use indoors and outdoors these highly efficient floodlights are an excellent replacement for security lighting, halogen floodlights, sodium floodlights, or for landscape lighting. LED lamps do not output excessive heat, while halogen can become extremely hot allowing for possible injury. Rated for wet conditions and are shockproof.
LED Shop lights have many advantages over traditional halogen work lights. The LED versions are 10x as efficient as halogen, this means a 30W LED light would be equivalent to a 300W Halogen, that is some serious energy savings! LED shop lights also put out no heat which makes for a much more comfortable working environment.

ADHESION PROMOTER APPLICATOR PADS

Part# 2001
- Increases bonding effectiveness of adhesives
- Convenient packet applicator is easy to use.
- Dries in approximately 30 seconds.
- One packet covers approximately 1 Sq./Ft.

DIELECTRIC GREASE

Part# 2080
- Seals out moisture
- Prevents corrosion
- Protects connections
- Net Wt. 7.5gr

Application: Apply generous amount onto contacts on any connection that is exposed to moisture or weather changes.

SINGLE COLOR HALO INSTALLATION KIT

Part# 2001
- 25ft 22AWG 2 Conductor Wire
- (1) In-Line Waterproof Fuse Holder
- (1) 7.5A Medium Blade Fuse
- (10) Waterproof Junction Connectors
- (2) Female Spade Terminals
- (1) LED Flicker Toggle Switch

COLORSHIFT HALO INSTALLATION KIT

Part# 1900
- 25ft 22AWG 4 Conductor RGB Wire
- (1) In-Line Waterproof Fuse Holder
- (1) 7.5A Medium Blade Fuse
- (10) Waterproof Junction Connectors

HEADLIGHT SEALANT - SINGLE BOTTLE

Part# 2001
- Single 10fl oz Tube
- Premium Black Silicone
- Becomes tack-free in 30 minutes
- Specifically formulated for sealing headlights
- Re-usable applicator
- Room temperature vulcanizing
- Use proper safety protection with this product

HEADLIGHT SEALANT - CASE OF 24

Part# 1999
- Case of 24 Tubes
- Premium Black Silicone
- Becomes tack-free in 30 minutes
- Specifically formulated for sealing headlights
- Re-usable applicators
- Room temperature vulcanizing
- Use proper safety protection with this product

20AWG 2-CONDUCTOR INSTALLATION WIRE

Part# 2005
- High Performing Cable
- Oxygen-Free Copper (OFC)
- Ideal for Single Color LEDs
- Sold by the FT or by the Spool
- 20AWG

This 20AWG 2-Conductor wire is the same cable used in the manufacturing of ORACLE SMD Halo Rings.

22AWG 4-CONDUCTOR INSTALLATION WIRE

Part# 2006
- High Performing Cable
- Oxygen-Free Copper (OFC)
- Ideal for ColorSHIFT LEDs
- Sold by the FT or by the Spool
- 4 Conductor
- 22 AWG

This 22AWG 4-Conductor wire is the same cable used in the manufacturing of ORACLE ColorSHIFT Halo Rings.
ORACLE Lighting provides Premium LED Drivers and Power Supplies in many different amperages and wattages. From indoor to exterior water-proof drivers, each driver meets or exceeds federal regulations for power supply adapters.

  - Special: Auto Save Function

**SIMPLE RGB LED CONTROLLER**

- **Part # 1612**
  - Input: 8-16V DC
  - Max Load Current: 12 Amps
  - Output: 3 Channels
  - Output Power: 144 Watts
  - Function: Allows surpassing of an LED Controller’s Output Rating.

**LED DIMMER SWITCH**

- **Part # 1708**
  - Input: 12-24V DC
  - Max Load Current: 4 Amps
  - Output: 1 Channel
  - Output Power: 100 Watts
  - Function: Dim LEDs from 0% to 100% brightness.

**LED PIR MOTION SENSOR**

- **Part # 1618**
  - Input: 12-24V DC
  - Max Load Current: 4 Amps
  - Output: 1 Channel
  - Output Power: 100 Watts
  - Function: Activates LEDs when IR Motion is detected.

**WALL PANEL SWITCH**

- **Part # 1707**
  - Input: 9-16V DC
  - Max Load Current: 4 Amps per Channel
  - Output: 3 Channels
  - Output Power: 144 Watts
  - Function: Control RGB LEDs with Touch Panel.

**RGB LED AMPLIFIER**

- **Part # 1605**
  - Input: 8-16V DC
  - Max Load Current: 4 Amps per Channel
  - Output: 3 Channels
  - Output Power: 144 Watts
  - Function: Amplifier allows user to surpass a LED Controller’s maximum output rating.
