*If you did not take your original classic course through Sweet P and feel you need assistance in some of the theory from the Classic curriculum, it's highly recommended to take the Back to Basics course.

Practical "hands on" experience is THE most critical portion to this course. Reading up on how to do lashes is NOT the same as actually DOING them.

A true understanding of extension application is vital for your success as a Lash Tech. In order to excel in the application of lash extensions you must invest in a course that is heavy on the "hands on" portion, not strictly theory focused.

Our goal for you is longevity in this industry. The only way to make that possible is by:

- -Ensuring your skill level far exceeds industry standards
- -Giving you all the tools necessary to hit the ground running with your business
- -Creating a solid relationship so that you are comfortable to reach out and ask for help when needed. Our support does not end when the course does!

When selecting the training program that is right for you, just remember.....an average training will leave you with average skills, average skills will lead to an average income. NO ONE should invest in average!

We would love to be a part of your lashing journey and having you be a part of the Sweet P family!
