

# 5 reasons your fans are closing

01

IF CLOSING DURING APPLICATION YOU ARE USING TOO MUCH GLUE!

CLIENTS LEAVE WITH FLUFFY LASHES BUT RETURN WITH CLOSED FANS.....

02

CLIENT HAS VERY ACTIVE OIL GLANDS AND NEEDS TO WASH EXTENSIONS MORE OFTEN

03

THEY ARE SECRETLY USING MASCARA (GASP!)

04

CLIENTS ARE USING SPRAY TONERS, SETTING SPRAYS ETC.

05

CLIENTS ARE WASHING LASHES WITH A CREAMY CLEANSER

Make sure clients are washing their lashes!  
Suggest a lash wash, or at bare minimum a gel or foaming cleanser! NO CREAMY CLEANSER OR BABY SHAMPOO!

if using any "spray" products on their face, ensure they are protecting/covering their lashes.

Watch your glue usage!  
too much glue will wick up the extensions and close your beautiful fans

If client is not willing to give up mascara, ask them to at least use an organic option that will wash out and not completely destroy your beautiful work
