# ENZ-FLAME™

ENZ-FLAME™ is a dietary supplement that combines 13 ingredients that work synergistically to support comfort, mobility and flexibility.\*

ENZ-FLAME™ has been designed to help support the body with general aches and pains relief associated with physical activity and over-exertion making it exceptional for every day support.\*

### ENZ-FLAME™ Supports:

- Joint comfort (including neck, shoulder, knee and extremities)\*
- Mobility, range of motion and flexibility\*
- Muscle and joint comfort.\*

### About the ingredients:

**Cetyl Myristoleate (CMO) Complex** is a group of fatty acid esters that work synergistically to support comfort.\* The CMO Complex works similar to the essential fatty acids EPA and DHA in that it supports the lubrication of cell membranes (which can become damaged and hard due to joint wear and tear) and supports the production of beneficial prostaglandins (PGE1 & PGE3) which have a positive effect on those enzymes that support joint comfort.\*

**Boswellia** is an herb that has been associated with improved joint comfort by helping the body maintain proper prostaglandin levels and helping the body manage **5-lipoxygenase chemicals and leukotriene synthesis**.\* Boswellia also provides antioxidant protection and supports the immune system.\* Boswellia works synergistically with Curcumin to support liver function and detoxification.\*

**Cayenne** contains a resinous and pungent substance known as capsaicin. This chemical supports comfort by acting on sensory nerves.\* Capsaicin temporarily supports the body's release of various neurotransmitters from these nerves, leading to their depletion.\* Without the neurotransmitters, capsaicin supports the body's ability to stop discomfort signals from being sent.\*

**Curcumin** is an herb that has been used for centuries in Asian cooking as an ingredient in curry. Curcumin is an antioxidant that works synergistically with boswellia to help the body maintain leukotriene and prostaglandin levels.\*

**DMG** is a versatile metabolic enhancer.\* It supports joint health through immune system modulation, circulation, oxygen utilization and antioxidant protection.\*

**Ginger Root** contains compounds that support comfort.\* It is believed to help the body support those prostaglandins and enzymes metabolized by arachidonic acid that contribute to joint discomfort.\*

**Luteolin** is a nutrient from a class of naturally occurring molecules known as bioflavonoids. As an antioxidant, Luteolin neutralizes free radicals and other reactive oxygen compounds that contribute to oxidative stress and discomfort.\* Maintaining a constant level of Luteolin in the body can help support comfort by providing strong antioxidant protection from oxidative stress.\*

**Proteolytic Enzymes** are capable of digesting protein, especially a substance called fibrin. Fibrin is an insoluble protein that is associated with fluid retention and tissue injuries. Proper regulation of fibrinolysis (the process of breaking down/dissolving fibrin) can help support healthy blood flow by ensuring that tissue receives the blood and oxygen required to support healing.\* Proteolytic enzymes also support the body's healing process of minor burns; injuries, particularly sprains and strains; muscle injuries; and the discomfort and tenderness that accompany injuries.\* Bromelain, Pancreatin, Papain, Pepsin and Protease are the proteolytic enzymes in this product that support comfort.\*

**Quercetin** is an antioxidant that helps support prostaglandin levels.\*

**Rutin** is a naturally occurring bioflavonoid that is found in most plants, vegetables and fruits. It is an antioxidant that scavenges superoxide radicals.\* Superoxide radicals are highly reactive chemicals that can damage cells and oxidize other molecules which can lead to oxidative stress and joint discomfort.\*

### Supplement Facts Serving Size 1 (9 gram) scoop

Amount Per Serving	
Calories	35
Total Carbohydrates	8 g
Vitamin C	1 mg
Calcium	25 mg
Cetyl Myristoleate (CMO) Complex	1,000 mg
Proprietary Proteolytic Enzyme Blend	930 mg
Containing Pancreatin, Bromelain, Papain, Pepsin, Protease	
N,N-Dimethylglycine HCl (DMG)	250 mg
Curcumin C3 Complex®	200 mg
yielding Curcuminoids	190 mg
Boswellia serrata Gum	200 mg
yielding Boswellic Acid	130 mg
Ginger (Zingiber officinale) Root Extract	50 mg
yielding Gingerols	2.5 mg
Quercetin (as Quercetin Dihydrate)	75 mg
Rutin	200 mg
Luteolin (from Perilla Leaf Extract)	8 mg
Cayenne (Capsicum annum) Pepper	5 mg
Stevia Leaf Extract	100 mg

Other ingredients: digestion resistant maltodextrin, orange powder, natural orange flavor, citric acid, tricalcium phosphate, silicon dioxide.

**Warning:** Do not take this product if pregnant or nursing, on anti-coagulants/anti-platelet medications, have gall stones or gall bladder disease.

**WARNING:** This product contains lead, a chemical known to the State of California to cause birth defects and other reproductive harm.

**Suggested Use:** As a dietary supplement, mix one scoop (9 g) in 8-10 oz of water and take daily, or as directed by your healthcare practitioner.

Curcumin C3 Complex® is a Patented product and registered trademark of Sabinsa Corporation.

Sold Exclusively Through Healthcare Practitioners.
