

Zymes 4 Kidz

Kidz Digest Powder*

Improving digestion for our children!*

Breastfeeding is the best source of nutrition for a child's healthy growth and development. Kidz Digest was created because we understand there are circumstances that prevent breastfeeding. Supplementing with digestive enzymes supports the digestion of formula and breast milk, assisting the body to maintain a healthy digestive system.* Once food is broken down into simple nutrients, the body's cells and tissues can absorb the resources they need for energy, growth, and repair. Whether breast fed or formula fed, Kidz Digest will support healthy digestion and alleviate the symptoms of occasional gas, cramping, bloating and reduce spitting up.*

- **Enzyme Blends.** Three enzyme blends work together to encourage a more complete digestion: a protease blend which includes DDP-IV to assist with the digestion of proteins, a lipase blend with 3,000 FIP of activity to assist with the digestion of fats, and a polysaccharolytic blend to assist with the digestion of sugars and starches.*
- **Powdered Product.** Kidz Digest in powdered form is easy to administer. Powder can be mixed in a small amount of tepid water and given just prior to feeding. Mixture can also be administered by mouth with a medicine syringe just prior to feeding if necessary.
- **Safe and Effective.** Transformation enzyme products have been clinically used for over 20 years to safely and effectively assist with the reduction of food sensitivities that may cause occasional gas, bloating, diarrhea, cramping, heartburn, and constipation.*

Health Benefits: Transformation's Kidz Digest is a gentle formula of effective, GI stable digestive enzymes designed to promote optimal digestion of nutrients.*
